## General Summary for Monday, 29 April, 2024

### British Mountain Summary:

**Based on forecast chart for noon 29 April, 2024**

Deteriorating - early in the day on many more western areas - as strengthening winds, rain and low cloud associated with a front extends slowly eastwards. The rain will amount to little southern Pennines, and largely dry until later in the day northern Scotland (where precipitation initially snow on the Munros).

### Headline for Peak District

Upland wind increasing to near gale force; rain on and off, mainly afternoon.

## Detailed Forecast for Monday, 29 April, 2024

<p><b>How windy? (On the summits)</b></p> <p><b>Effect of wind on you?</b></p>	<p>Southerly 20mph at first, progressively strengthening to 30mph by midday and 35, perhaps temporarily 40mph highest summits into afternoon. May well ease a little evening.</p> <p><b>Will increasingly impede ease of walking, before where exposed on higher areas considerable buffeting and wind chill develops.</b></p>
<p><b>How wet? (Precipitation and its impact)</b></p>	<p><b>Occasional rain, mainly afternoon</b></p> <p>Risk of a few bursts of showery rain in morning, whilst the rain then 'on and off'.</p>
<p><b>Cloud on the hills?</b></p> <p><b>Chance of cloud free summits?</b></p>	<p><b>Very little morning; tending to cover higher tops afternoon</b></p> <p>Hills widely cloud free morning. Gradually in rain, fog forming above about 500m, perhaps locally 400m later in day.</p> <p><b>90% dropping to 50%</b></p>
<p><b>Sunshine? Air clarity (below cloud)</b></p>	<p>Weak sunshine at times through layers of cloud. Very good or excellent visibility.</p>
<p><b>Temperature (at 600m)</b></p> <p><b>And in the valleys</b></p>	<p>4C rising to 8C. Will feel as cold as minus 3C directly in the wind.</p> <p>Will reach around 14C in the afternoon.</p>

## Peak District - Looking Ahead

	<b>Tuesday 30 April</b>	<b>Wednesday 1 May</b>
<b>How windy? (On the summits)</b> <b>Effect of wind on you?</b>	South to southeasterly speeds may well vary: typically 20mph, but perhaps sometimes 25mph on higher summits. <b>Mostly fairly small.</b>	Southeasterly between 10 and 20mph: generally strongest in the morning. <b>Small</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Risk showers</b> Frequently or completely dry. Nevertheless, risk of a few bursts of rain - possibly heavy during evening.	<b>Little or no rain.</b> A little rain and drizzle before dawn will fizzle out. Risk isolated showers afternoon; and possibly a burst of thundery rain by dusk.
<b>Cloud on the hills?</b>	<b>Very little</b>	<b>Soon all clearing</b>
<b>Chance of cloud free summits?</b>	<b>90%</b>	<b>90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Occasional sun through layers of high level cloud. very good visibility.	Cloud layers gradually thinning and breaking to give a patchwork of sun. Excellent visibility.
<b>Temperature (at 600m)</b> <b>And in the valleys</b>	8 rising to 12C  Rising to 16 to 18C in the afternoon.	7C rising toward 12C  16 to perhaps locally 18C by late afternoon.

**Planning Outlook****All mountain areas of Britain from Tuesday, 30 April, 2024**

Considerably warmer this week. Rain from time to time, although from Wednesday largely dry in Scotland and perhaps N England - although the risk of bursts of rain, perhaps thunder. Wales will be most prone to further rain. As yet, considerable uncertainty in the detail next weekend, although ensemble of forecast models suggest light wind, fairly warm with some sunshine. Most uncertain is the extent and locations of possible showery rain or thunderstorms.
