## General Summary for Saturday, 20 April, 2024

### British Mountain Summary:

#### Based on forecast chart for noon 20 April, 2024

Most places dry all day with variable cloud and sun. Winds fairly light, but feeling chilly if exposed over higher terrain. Locally breezier in northern Scotland. A weak front drifting in from the northwest brings a little rain or drizzle to the northern Highlands mainly into afternoon.

### Headline for Eryri / Snowdonia National Park

Dry with broken cloud, tops clear. Light winds.

## Detailed Forecast for Saturday, 20 April, 2024

<b>How windy? (On the summits)</b>	Northerly 10 to 15mph.
<b>Effect of wind on you?</b>	Generally small, but will feel chilly if exposed to a breeze on higher slopes - in contrast to feeling pleasant where sheltered if in sunshine.
<b>How wet? (Precipitation and its impact)</b>	Precipitation not expected
<b>Cloud on the hills?</b>	<b>Mostly very little</b> Patches may graze northern tops around Carneddau for a time in the morning. Otherwise any fragments soon dispersing, cloud generally forming above the hills.
<b>Chance of cloud free summits?</b>	<b>80%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Often sunny, a little patchy cloud building up mainly inland areas. Visibility excellent. Local mist some valleys at first.
<b>How Cold? (at 900m)</b>	1C early morning, rising to 4C afternoon. If exposed to breeze, feeling like -4C early in day, near 0C afternoon.
<b>Freezing Level</b>	Slight frost in sheltered valleys and near freezing some higher terrain at first. Lifting well above freezing to all tops.

**Eryri / Snowdonia National Park - Looking Ahead**

	<b>Sunday 21 April</b>	<b>Monday 22 April</b>
<b>How windy? (On the summits)</b>	Northeasterly 15 to 25mph.	Northerly 20 to 25mph.
<b>Effect of wind on you?</b>	<b>Fairly small, but a marked wind chill if exposed on higher terrain, especially east-facing areas.</b>	<b>Fairly small effect on walking, but may start to affect balance on ridges. Marked wind chill on exposed higher terrain.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Mostly dry</b> Chance of one or two isolated brief showers forming mainly afternoon.	<b>A little rain on and off</b> Patchy showery rain, most frequent toward north and eastern areas.
<b>Cloud on the hills?</b>	<b>Local patches, mostly little west</b>  Patchy cloud banks may drift onto tops mainly around Carneddau in the morning. Much cloud above the tops, western hills clearer overall.	<b>Most persistent north</b>  Varied banks of cloud, may persist over higher slopes around Carneddau all day. Breaks toward west coast.
<b>Chance of cloud free summits?</b>	<b>70%</b>	<b>40%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Sun likely best in west, broken cloud. Cloudier toward east. Visibility very good.	Often cloudy, some sun in west. Visibility good, but reduced in showers.
<b>How Cold? (at 900m)</b>	2 to 4C. If exposed to stronger wind, feeling as cold as -5C on higher summits.	4C. Wind chill feeling nearer -4C on tops.
<b>Freezing Level</b>	Above the summits, but later in day dropping close to freezing on highest tops.	Above the summits.

**Planning Outlook**

**All mountain areas of Britain from Sunday, 21 April, 2024**

Into early next week, high pressure will be centred toward the northwest, with sunny spells and scattered light showers. Northerly winds bring lower temperatures into midweek, near or below freezing over higher terrain, coldest toward the east. Lowering pressure is expected later in the week, turning more widely showery again with upland snow, plus hail. Day-to-day variations in extent of showers and cloud amounts. Cool conditions are likely to continue toward the change of month into early May, at least in Scotland.

**Forecast issued at 16:00 on Friday, 19 April, 2024**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
