## General Summary for Thursday, 19 September, 2024

### British Mountain Summary:

**Based on forecast chart for noon 19 September, 2024**

Dry and bright sunshine for almost all British hills. Patches of valley fog in the morning, especially near the coast, lakes or rivers. Warm, temperature rising to over 20C in most valleys. Light winds, sometimes hardly any wind. Excellent visibility, especially toward the north.

### Headline for Brecon Beacons

Dry, sunny & warm, often valley fog in the morning

## Detailed Forecast for Thursday, 19 September, 2024

<b>How windy? (On the summits)</b>	Easterly 15 to 20mph widely, in places near Cardigan Bay 30mph for a while.
<b>Effect of wind on you?</b>	Mostly fairly small, although sudden gusts in the west affecting both higher and lower slopes.
<b>How wet? (Precipitation and its impact)</b>	Rain not expected
<b>Cloud on the hills?</b>	<b>Very little if any</b> Fog shrouding lower slopes below or well below 550m, manly east Wales. Will disperse latest middle of day.
<b>Chance of cloud free summits?</b>	70%
<b>Sunshine?</b> Air clarity (below cloud)	Extensive or unbroken bright sunshine. Ribbons of fog some valleys and lower slopes east Wales, mainly morning.
<b>How Cold? (at 750m)</b>	15C
<b>Freezing Level</b>	Above the summits.

## Brecon Beacons - Looking Ahead

	Friday 20 September	Saturday 21 September
<b>How windy? (On the summits)</b>	Easterly 20 or 25mph.	East to northeasterly, 15 to 20mph, locally 25mph.
<b>Effect of wind on you?</b>	<b>Fairly small</b>	<b>Mostly small.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Risk of showers, locally risk thunder</b> One or two periods of showery rain - perhaps a heavy burst with risk an isolated thunder. Most showers in the evening, rain very unlikely before late afternoon.	<b>Showers possible, perhaps thundery.</b> Risk showers, highest late in the day toward Black Mountains, but may appear anywhere. Showers may locally be briefly heavy and thundery.
<b>Cloud on the hills?</b>	<b>Increasingly widespread</b>  Cloud between 200-450m highest toward the west. Highest summits often above the cloud (or between cloud layers), particularly in the morning.	<b>Hills covered at times on various levels</b>  Thick valley fog or very low cloud in the morning below 500m. During the day fog slowly dispersing, but afternoon cloud possibly coming and going on various higher levels.
<b>Chance of cloud free summits?</b>	<b>50%</b>	<b>60%, tops in the morning cloud-free</b>
<b>Sunshine?</b> Air clarity (below cloud)	Occasional sunshine, mainly west Wales. Hazy, particularly east Wales..	Intermittent sun, becoming cloudy toward the evening from the southeast. Moderate/good visibility, haze in the air.
<b>How Cold? (at 750m)</b>	7 to 13C, coldest where where in cloud.	13 or 14C
<b>Freezing Level</b>	Above the summits.	Above the summits.

**Planning Outlook****All mountain areas of Britain from Friday, 20 September, 2024**

High pressure conditions with a lot of sunshine, warm temperatures and calm winds will continue until early next week in Scotland and northern England. In Wales and Peak District from Friday onward mix of sun and clouds, with locally heavy showery bursts of rain, possibly isolated thunder.

Beginning of next week showers possible also northern England and parts of Scotland, although Highlands still mostly dry and sunny until mid next week. Then, weather conditions may deteriorate across all British mountains with cooling and strong winds, although further development uncertain.

**Forecast issued at 13:24 on Wednesday, 18 September, 2024**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
