<b>Sunshine?</b> Air clarity (below cloud)	Weak sunbeams coming through clouds. At start very sunny toward Black Mountains. Mostly poor visibility.	Very sunny and excellent visibility if not in low cloud.
<b>How Cold? (at 750m)</b>	8 to 10C	9 to 12C
<b>Freezing Level</b>	Above the summits.	Above the summits.

**Planning Outlook****All mountain areas of Britain from Wednesday, 30 October, 2024**

West to southwesterlies prevail with high pressure extending across Britain for rest of the week, keeping dry conditions for most, although some rain may continue to affect northwest Scotland. Low cloud fairly widespread, some fog into valleys, with local inversion conditions developing. On Friday chillier northwesterly air is likely over the Highlands, dropping to freezing over higher Scottish mountains, some showers with snow - elsewhere dry and staying mild. Later back to west and southwesterlies, high pressure shows signs of keeping most of Britain dry until end of next week.

**Forecast issued at 16:11 on Monday, 28 October, 2024**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
