## General Summary for Sunday, 23 March, 2025

### British Mountain Summary:

#### Based on forecast chart for noon 23 March, 2025

Chilly north to northeasterly winds; air temperature near freezing on higher Scottish tops. Rain and mountain top snow in eastern Highlands gradually fading, but low cloud persists. Sunnier skies emerging in western Scotland. England & Wales sees patchy rain, drizzle and low cloud, local showers toward south.

### Headline for Brecon Beacons

Chilly wind. A little rain, local showers, low cloud rising slowly.

## Detailed Forecast for Sunday, 23 March, 2025

<b>How windy? (On the summits)</b>	North or northeasterly 20mph, or toward west gusty 30mph.
<b>Effect of wind on you?</b>	<b>Affecting ease of walking on higher areas; marked wind chill particularly morning.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Local drizzle or an odd shower</b> Patchy drizzle at times, mainly mid-Wales and at times more widely on eastern hills. Risk of local showery bursts forming in the afternoon.
<b>Cloud on the hills?</b>	<b>Extensive, cloud base rising</b> Generally cloud base rising through day; by early afternoon mostly confined to highest summits and some higher breaks forming especially in west. Lowering again where rain occurs.
<b>Chance of cloud free summits?</b>	<b>20% rising to 50% by afternoon</b>
<b>Sunshine?</b> Air clarity (below cloud)	Mostly cloudy. Good visibility out of cloud, but rather dull especially eastern areas.
<b>How Cold? (at 750m)</b>	5C; tending to rise slowly through the day. Wind chill feeling like -2C in morning.
<b>Freezing Level</b>	Above the summits.

## Brecon Beacons - Looking Ahead

	Monday 24 March	Tuesday 25 March
<b>How windy? (On the summits)</b>  <b>Effect of wind on you?</b>	Northerly 15 to 20mph in morning, easing to 10-15mph by middle of day, turning northwesterly; by dusk up to 20mph. <b>Mostly small.</b>	Northwesterly 20 to 25mph.  <b>Fairly small, but feeling blustery and cool where exposed around higher tops.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Rain very unlikely</b> Risk pockets of drizzle east Wales early morning.	<b>A little rain in morning</b> Patchy rain and drizzle during the morning, mainly western Cambrians. Fizzling out to be largely dry. Little if any rain reaching areas toward southeast.
<b>Cloud on the hills?</b>   <b>Chance of cloud free summits?</b>	<b>Early low cloud clearing</b>  Risk banks of low cloud early in day covering eastern hills for a few hours above 300-400m. Lifting to upper slopes and largely dispersing in middle of day.  <b>20% rising to 90%</b>	<b>Covering hills, lowest west, breaking</b>  Shrouding the hills above 500 to 600m from dawn, lowest toward Cardigan Bay, some higher breaks toward the east. Cloud lifting and breaking widely afternoon.  <b>20% rising to 70%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Patchwork of sun - perhaps dull more eastern hills morning. Excellent visibility.	Largely cloudy morning, but some sun breaking through during afternoon. Visibility mostly good, later very good.
<b>How Cold? (at 750m)</b>  <b>Freezing Level</b>	3C rising to 6C.  Above the summits.	4 to 7C. Wind chill feeling near/just below freezing.  Above the summits

## Planning Outlook

### All mountain areas of Britain from Monday, 24 March, 2025

A mixed westerly regime for the next week to ten days - fronts coming in from the west bringing spells of rain, interspersed with better days under ridges of high pressure. Rain most frequent in western Scotland. Wind speeds varied, but at times reaching gale force over the mountains. Temperature varied, occasionally just below freezing on higher Scottish summits, with some showers with snow at times on the Munros - possibly chillier for a few days around next weekend (29-30 March).

### Forecast issued at 16:25 on Saturday, 22 March, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
