Chance of cloud free summits?	Above 90%	Above 90%
Sunshine? Air clarity (below cloud)	Extensive strong sunshine. Visibility excellent.	Extensive warm sunshine. Excellent visibility.
How Cold? (at 750m)	8C rising to 11C; feeling like 3C in the breeze.	6 or 7C, rising to 13C
Freezing Level	Above the summits	Above the summits

Planning Outlook

All mountain areas of Britain from Thursday, 15 May, 2025

High pressure persists north of Britain this week into the weekend bringing dry, warm and sunny weather. East to northeasterly winds prevail, at times strong and gusty, mainly England and Wales. Some coastal fog and low cloud drifting inland from the North Sea will affect eastern areas in the mornings (high terrain in Scotland often above the cloud layer), largely dispersing through middle of daytimes. Highest temperatures typically toward the west. Very dry ground conditions, beware high risk of fire.

Forecast issued at 15:22 on Tuesday, 13 May, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
