General Summary for Wednesday, 4 June, 2025

British Mountain Summary:

Based on forecast chart for noon 4 June, 2025

Cold: showers (very frequent west) of hail and on higher slopes snow and gale force upland winds. Southward into England and Wales, a little less cold, progressively fewer showers and decreasingly windy.

Headline for Brecon Beacons

A few showers; fairly light wind.

Detailed Forecast for Wednesday, 4 June, 2025

How windy? (On the summits)	Southwesterly 15 to 20mph
Effect of wind on you?	Small
How wet? (Precipitation and its impact)	Scattered showers A few showers - although from west becoming extensively dry afternoon.
Cloud on the hills?	Clearing all or almost all summits Patches will come and go over tops above 500 or 600m SW Wales as showers move in, but generally by late morning summits cloud free.
Chance of cloud free summits?	80% by midday
Sunshine? Air clarity (below cloud)	Patches of sunshine, perhaps fairly widespread eastern hills for a few hours morning and more sun extending inland from Cardigan Bay through afternoon. Visibility good, but slight haze, and lowering briefly in showers.
How Cold? (at 750m)	5C rising to 7 to 9C, warmest east Wales. Feeling closer to freezing point where exposed to the wind.
Freezing Level	Above the summits

Brecon Beacons - Looking Ahead

	Thursday 5 June	Friday 6 June
How windy? (On the summits) Effect of wind on you?	Southwesterly 20 to occasionally 25mph. Fairly small.	West backing southwesterly 15 to 20mph. Will strengthen to 25 or 30mph afternoon or evening. Mostly small - although toward evening could well increasingly impede ease of walking where exposed.
How wet? (Precipitation and its impact)	Rain on and off; mostly clearing afternoon Pulses of rain, mostly west Wales, will ease to a few showers or perhaps clear completely afternoon.	Showery rain increasingly Showers morning mainly western hills, before rain becomes more extensive; by afternoon setting in for periods at least west Wales.
Cloud on the hills? Chance of cloud free summits?	Very uncertain at this stage: Extensive in rain. Low confidence: In rain western mountains, fog may form extensively above 350m, but perhaps shrouding lowest slopes SW Wales and southern slopes Brecon Beacons. Breaks to 600m north from Black Mountains and more widely through	Clearing most, perhaps nearly all summits; may/will lower again later in Cloud base rising; by late morning most cloud above the summits. Will lower from southwest afternoon and evening to shroud higher areas, perhaps eventually shrouding lowest slopes SW Wales and south Brecon Beacons.
Sunshine? Air clarity (below cloud)	Sunshine from time to time, although probably extensive cloud particularly west Wales. Visibility mostly very good but poor in rain.	Patches of sunshine, mainly east Wales, before high level cloud thickens from southwest. Excellent visibility.
How Cold? (at 750m) Freezing Level	8C. Above the summits.	7C near the coast, rising to 10C well inland. Above the summits.

Planning Outlook

All mountain areas of Britain from Thursday, 5 June, 2025

Remaining chilly (intermittently near freezing point highest Scottish summits) for the remainder of the week - and probably most of next week. Rainfall and low cloud will remain frequent across particularly western mountains. Often windy higher summits - although mostly speeds below gale force.

Forecast issued at 15:03 on Tuesday, 3 June, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
