General Summary for Tuesday, 19 August, 2025

British Mountain Summary:

Based on forecast chart for noon 19 August, 2025

A cooler feeling day with a rather gusty east to north-east airflow. An extensive cloud sheet, with local drizzle, covering many hills from dawn, but some westernmost hills still clear. Low cloud will burn back to eastern and northern hills, with sun most widely in the west, but low cloud persisting for parts of coastal western Scotland.

Headline for Brecon Beacons

Breezy, feeling cooler. Some hazy sun, but also risk showers.

Detailed Forecast for Tuesday, 19 August, 2025

How windy? (On the summits)	Easterly 15 to 20mph, but gusty 25-30mph around some higher tops and through elevated passes.
Effect of wind on you?	Noticeably breezy and feeling cool in exposure, gusts on some slopes may start to affect comfortable walking.
How wet? (Precipitation and its impact)	Patchy rain, mostly south Patchy rain from high cloud toward the south, risk more frequent early in the day in Pembrokeshire before clearing offshore. Local shower elsewhere.
Cloud on the hills?	Some cloud in morning clearing Patchy cloud banks may drift in on wind, may cover some eastern slopes for a few hours morning above 600-700m, increasingly will lift, thin and break to leave the hills clear into middle of day.
Chance of cloud free summits?	60% rising to 90%
Sunshine? Air clarity (below cloud)	Hazy sun best in west all day, occasional hazy sun breaking through in east. Visibility very good.
How Cold? (at 750m)	12 to 15C, then dropping towards 9C overnight.
Freezing Level	Above the summits

All mountain areas of Britain from Wednesday, 20 August, 2025

High pressure centred toward the northwest this week, before building overhead again toward weekend. East to northeasterly winds prevailing, gusty for periods, easing out later in week. Extensively dry with sunshine best in west, low cloud for periods northern and eastern mountains with occasional drizzle. Still very dry underfoot with significant fire risk. Turning cooler through midweek, mountain temperatures falling, chilly into the valleys and glens pre-dawn, risk slight frost in Highland glens. Fine weather likely next weekend too; will likely begin to break down from the west into the following week, but uncertainty on timings of such a transition.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
