General Summary for Sunday, 19 October, 2025

British Mountain Summary:

Based on forecast chart for noon 19 October, 2025

Gale-force south to southeasterlies across the mountains. Extensively wet with blanket low cloud. The heaviest rain across Wales and southwest Scotland, pushing further across the southern Highlands with time. Driest conditions for northern Scotland early in day; briefly drier Pennines mid-late morning.

Headline for Brecon Beacons

Upland gales. Heavy rain soon continuous morning into afternoon.

Detailed Forecast for Sunday, 19 October, 2025

How windy? (On the summits)	South to southeasterly, 35 to 50mph, likely strongest in morning, very gusty around high tops; later in day 25mph.
Effect of wind on you?	Challenging conditions over the mountains, frequent buffeting gusts affecting balance. Marked wind chill. Improving with time.
How wet? (Precipitation and its impact)	Sustained heavy rain, fading afternoon Rain soon widespread from dawn, at first may be patchier eastern mid-Wales. Several hours of continuous heavy rain setting in from the southwest. During afternoon, tending to ease and break up, some showers follow.
Cloud on the hills?	Extensive, lowest south Shrouding the mountains likely all day, to many mid-slopes upward, or lower slopes on south-facing areas. Base tending to lift with ragged patches rising later in the day.
Chance of cloud free summits?	10%
Sunshine? Air clarity (below cloud)	Overcast, murky in rain. Visibility improving later afternoon, chance of some sun briefly breaking through.
How Cold? (at 750m)	9 or 10C, small change with height on hills. Feeling like -3 to -5C directly in the wind.
Freezing Level	Above the summits

All mountain areas of Britain from Monday, 20 October, 2025

A mixed outlook into the new week as low pressure dominates with areas of rain and showers , which will vary locally day-to-day. Some windows of drier weather, particularly central parts of the Highlands. Wind speeds will also vary, but some lulls, but abrupt spells of upland gales possible. Risk of heavier rain spreading from Wales into northern England and southern Scotland later Wednesday into Thursday. Likely significantly colder later in the week with northerly winds, dropping below freezing on higher mountains, with snow showers especially Scottish Munros.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
