General Summary for Tuesday, 21 October, 2025

British Mountain Summary:

Based on forecast chart for noon 21 October, 2025

Patchy rain drifts east across the Highlands, breaking up into showers. Staying showery all day toward west coast, locally more frequent rain. Showery rain throughout the day for England and Wales, occasionally heavy. Low cloud most persistent west. Increasingly windy, feeling cold.

Headline for Brecon Beacons

Windy, showers most common west, cloud varied on tops.

Detailed Forecast for Tuesday, 21 October, 2025

How windy? (On the summits)	Westerly 25 to 30mph, some gusts 35mph at times around highest summits.
Effect of wind on you?	Blustery over the hills, affecting comfortable walking in places on higher tops. Considerable wind chill.
How wet? (Precipitation and its impact)	Passing showers, more frequent west Showery rain will come and go all day, most common western Cambrians. Scattered showers passing though more quickly further south/east, briefly heavy.
Cloud on the hills?	High western tops often in cloud Often covering higher terrain above 600-800m, lowest and most frequent western areas. Breaks at times higher up further east toward the Black Mountains.
Chance of cloud free summits?	30%
Sunshine? Air clarity (below cloud)	Largely cloudy, brief glimpses of sun mainly in east Wales. Visibility very good away from rain.
How Cold? (at 750m)	7 or 8C, little change, small variation with height in morning. Feeling below freezing in the wind.
Freezing Level	Above the summits

All mountain areas of Britain from Wednesday, 22 October, 2025

A complex weather situation through midweek, with various centres of low pressure drifting around slowly. Areas of rain and showers, but also drier moments - Wednesday and possibly Thursday often dry in eastern Scotland and northern England - beware of a deterioration from the northwest during Thursday with gales and rain setting in . Significantly colder later in the week as winds turn northerly. Freezing level dropping to 800-1000m into the weekend, lowest in northern Scotland. A mix of sunshine and showers falling as snow on high terrain , most frequent in north-facing areas.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
