General Summary for Tuesday, 11 November, 2025

British Mountain Summary:

Based on forecast chart for noon 11 November, 2025

Rain from dawn in Wales soon spreads widely into England and southern Scotland, setting in for several hours; nearly constant all day for Lakeland and Galloway hills. Widespread gales as well, severe in Wales. A drier start for Scottish Highlands, though rain will spread from the south afternoon with strengthening wind.

Headline for Brecon Beacons

Severe gales over the tops with frequent rainfall

Detailed Forecast for Tuesday, 11 November, 2025

How windy? (On the summits)	Southerly, strengthening rapidly overnight up to dawn, 45 to 60mph all day, gusts reaching up to 70mph high tops.
Effect of wind on you?	Difficult walking conditions on higher terrain, powerful gusts knocking you off your feet, including downslope gusts on northern aspects. Marked wind chill despite mild air.
How wet? (Precipitation and its impact)	Rain and drizzle, heavier later Several hours of constant rain from dawn, heavy west and south. This fading to patchy light rain and drizzle, but later likely prolonged heavier rain setting in again from the west, ongoing into evening.
Cloud on the hills?	Extensive, lowest south Blanket low cloud across the hills, from lower slopes up in southern areas. Highest bases to 500-600m eastern mid Wales, a few odd higher breaks possible though ragged patches will cling to lower slopes.
Chance of cloud free summits?	Below 10%
Sunshine? Air clarity (below cloud)	Overcast and murky. Very poor visibility though occasional improvements during rain breaks towards mid-Wales.
How Cold? (at 750m)	Rising from before dawn to 6C, soon up to 9 or 10C and staying elevated through afternoon; only small fall with height. Feeling like -5C directly in the wind.
Freezing Level	Above the summits

All mountain areas of Britain from Wednesday, 12 November, 2025

Later in the week and into the weekend, high pressure draws colder air into Scotland and progressively further south into England and Wales over the weekend. Strong easterlies are likely over England and Wales and conditions will be largely dry with some clear hills and sunny bursts; overnight frosts likely widespread in Scotland. The weather regime the following week is uncertain but first indications suggest more unsettled weather.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
