General Summary for Sunday, 23 November, 2025

British Mountain Summary:

Based on forecast chart for noon 23 November, 2025

Low pressure will dominate the weather bringing areas of strong winds, rain (or snow on higher areas) and extensive fog to the hills - whiteout in places mainly southern Highlands. Windiest in Wales where upland gales will strengthen, whilst least windy S Scotland.

Headline for Brecon Beacons

Showery rain; upland wind strengthening toward gale.

Detailed Forecast for Sunday, 23 November, 2025

How windy? (On the summits)	Westerly, 30 to perhaps 35mph morning, but gradually strengthening 40mph by dusk.
Effect of wind on you?	Significant wind chill and arduous or difficult walking, particularly afternoon.
How wet? (Precipitation and its impact)	Heavy showers Rain overnight soon clearing. Then showers, some heavy with hail and low risk thunder.
Cloud on the hills?	Extensive on higher tops Cloud base varied, but widely covering hills above 500-800m, lowest near to west coast, where near showers temporarily forming on lower slopes.
Chance of cloud free summits?	20%
Sunshine? Air clarity (below cloud)	Glimpses of sun, mainly east Wales. Hazy, and visibility poor in precipitation.
How Cold? (at 750m)	2C. Will feel like -12C directly in the wind later in the day.
Freezing Level	Above the summits

Brecon Beacons - Looking Ahead

	Monday 24 November	Tuesday 25 November
How windy? (On the summits)	Northerly, 25 to 30mph.	Northerly 25mph gradually easing to 15mph.
Effect of wind on you?	Will impede ease of walking across the hills, and at times in gusty conditions, balance may be tricky and wind chill considerable.	Becoming small
How wet? (Precipitation and its impact)	Little or perhaps no precipitation Intermittent rain overnight will continue into daylight, but will amount to little and through morning ease to just a few showers in west Wales.	Little or no precipitation Showers, mainly Preseli hills.
Cloud on the hills?	Cloud base rising - probably clearing higher summits Morning: cloud shrouding higher areas extensively. Gradually cloud base rising toward 750 to perhaps 900m.	Mostly or all clearing the summits Patchy cloud above 500 or 600m west Wales and 800m elsewhere.
Chance of cloud free summits?	60%	80%
Sunshine? Air clarity (below cloud)	Patches of sunshine slowly coming through. Visibility very good or perhaps in afternoon excellent.	Bright sunshine. Very good or excellent visibility.
How Cold? (at 750m) Freezing Level	Around 2C - a marginal drop likely through the day Will feel as cold as minus 5C directly in Above the summits.	1C Around 900m; may rise slowly through day. Frost some valleys morning.

Planning Outlook

All mountain areas of Britain from Monday, 24 November, 2025

After a brief burst of cold air on Monday and Tuesday winds will turn westerly. It will be milder with a week or more frequent rain and upland gales, particularly on western mountains. In Scotland, temperatures on the Munros will sometimes be below freezing point, but fresh snow transient, whereas elsewhere, snow rare, if any.
