General Summary for Saturday, 29 November, 2025

British Mountain Summary:

Based on forecast chart for noon 29 November, 2025

Snow showers toward northern Scotland, but much of the Highlands will be dry - sunshine and cloud breaks best toward southwest; sub-zero on tops, chilly northerly breeze. England and Wales sees rain fairly widely, snow falling on higher tops; wind very variable, but risk gales developing.

Headline for Brecon Beacons

Showery rain more constant afternoon, moderate wind til late.

Detailed Forecast for Saturday, 29 November, 2025

How windy? (On the summits)	Some uncertainty remains as a complex weather system moves slowly: Westerly 20mph, possibly less for a few hours. Late afternoon shifting northerly, risk rapid increase to 40mph soon after dusk.
Effect of wind on you?	Likely fairly small perhaps much of daylight, but be aware of possibly rapidly worsening conditions from sunset, significant wind chill after dark.
How wet? (Precipitation and its impact)	Rain more widely by afternoon Very wet underfoot, streams in spate following heavy overnight rain. Patchy rain on and off into the morning, some showery bursts in west, drier in east. In afternoon, more frequent rain widely, at times heavy, by dusk snow high tops.
Cloud on the hills?	Mostly higher areas Hills often covered by cloud banks much of day, particularly western areas, lowering in rain more widely. Occasional breaks to 600-700m or above may form mainly over eastern mid-Wales.
Chance of cloud free summits?	30%
Sunshine? Air clarity (below cloud)	Overcast. Visibility often poor due to rain.
How Cold? (at 750m)	2C, dropping to 0C from dusk. Feeling like -10C as wind speed increases into evening.
Freezing Level	Just above highest tops, but dropping into evening to 700-800m.

All mountain areas of Britain from Sunday, 30 November, 2025

After a lull on Sunday, areas of low pressure then circulating to the west and north will dominate the weather pattern into next week, bringing generally unsettled weather. Southwesterly air and briefly milder into Monday, with rain for most places at times, but prolonged heavier rain for England and Wales. Then typically cooler with showery conditions - higher mountains near or just below freezing point likely for the remainder of the week - some snow on tops, occasional hail. Wind speed likely to vary, some squally gusty spells, but also some lulls possible during the week ahead.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
