General Summary for Saturday, 7 February, 2026

British Mountain Summary:

Based on forecast chart for noon 7 February, 2026

Continuing with the east to south-easterly airflow with hills shrouded in extensive low cloud with widely murky conditions. Patchy snow across the Highlands tending to ease, best breaks again toward the northwestern coasts of Scotland.

Showery rain extending north through Wales into northern England.

Headline for Brecon Beacons

Detailed Forecast for Saturday, 7 February, 2026

How windy? (On the summits)	South-easterly 15 to 30mph
Effect of wind on you?	Likely to become increasingly blustery with gradual increase in speeds through day.
How wet? (Precipitation and its impact)	Heavy showers Heavy showers, particularly SW Wales - risk that the rain may be almost constant for an hour or two.
Cloud on the hills?	Extensive, down to mid or lower slopes. Extensive low cloud covering the hills, with bases right down to mid if not lower slopes.
Chance of cloud free summits?	10%
Sunshine? Air clarity (below cloud)	No sun expected. Rather mist and murky with atmospheric visibility suppressed.
How Cold? (at 750m)	4C
Freezing Level	Above the summits.

Brecon Beacons - Looking Ahead

	Sunday 8 February	Monday 9 February
How windy? (On the summits)	Southerly typically 15 to 20mph possibly 25mph at times.	South-easterly 20 to 30mph, perhaps 35-40mph at times western coastal hills.
Effect of wind on you?	Mostly small	Blustery and gusty for periods, especially western coastal hills, where perhaps fairly arduous. Considerable wind chill.
How wet? (Precipitation and its impact)	Showers Showery; some showers heavy; risk hail.	Patches or spots of rain here and there Patches of rain, or just occasional spots, here and there. Amounts small, but nonetheless giving damp weather at times.
Cloud on the hills?	Extensive on higher slopes. Cloud base typically 500 to 700m, but nearer 300m in rain.	Extensive Extensive hill fog once more across the hills. Lowest bases near and east of Brecon.
Chance of cloud free summits?	10%	10%
Sunshine? Air clarity (below cloud)	Occasional sunshine; visibility very good, but poor in rain.	Overcast. Widely misty and murky.
How Cold? (at 750m)	3 or 4C	3C
Freezing Level	Above the summits.	Above the summits

Planning Outlook**All mountain areas of Britain from Sunday, 8 February, 2026**

Overall little change in conditions over the coming week: the mountains extensively foggy, precipitation from time to time (again concentrated on eastern Scotland and southern and eastern Wales) and often strong southeast or easterly wind. However, a slight rise in temperature will result in thawing of lying snow from southern Scotland southwards and some thawing up to around 900, sometimes 1050m Scottish Highlands - although the return of low freezing level toward the middle of next week.

Forecast issued at 15:00 on Friday, 6 February, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
