Freezing Level	Above the summits.

Brecon Beacons - Looking Ahead

	Monday 9 February	Tuesday 10 February
How windy? (On the summits)	South-easterly 20 to 30mph, probably strengthening to 35-40mph.	Southerly 20 or 25mph; although may strength toward 40mph late in day.
Effect of wind on you?	Blustery and gusty for periods, especially western coastal hills, where perhaps fairly arduous. Considerable wind chill.	Mostly fairly small, but anticipate increasingly arduous walking later in the day
How wet? (Precipitation and its impact)	Patches or spots of rain here and there Patches of rain, or just occasional spots, here and there. Amounts small, but nonetheless giving damp weather at times.	Occasional rain It may stay dry much of or all day, but there may be further rain approaching from southwest toward evening.
Cloud on the hills?	Extensive Extensive low cloud covering the mountains, cloud base mostly between 500 and 700m, lowest Preseli to southern Brecon Beacons. Cloud base likely to drop toward 300m in rain.	Most higher mountains persistently foggy Cloud base widely 600m to 750m, although may come and go above 450m Preseli and southern Brecon Beacons But cloud base will drop in rain.
Chance of cloud free summits?	30%	40%
Sunshine? Air clarity (below cloud)	Overcast. Widely misty and murky.	Occasional sunshine, mostly lower slopes mid Wales. Mostly very good or excellent visibility.
How Cold? (at 750m)	3C	4C
Freezing Level	Above the summits	Above the summits.

Planning Outlook

All mountain areas of Britain from Monday, 9 February, 2026

Little change over the next few days with continued foggy conditions over most mountains, and rain, or on higher mainly Scottish areas snow. Intermittently southeasterly winds approaching gale force.
Later in the week, progressively colder from the north with fresh snow on many mountains.
