## General Summary for Monday, 25 May, 2026

**British Mountain Summary:**  
**Based on forecast chart for noon 25 May, 2026**

High pressure brings another extensively sunny and unseasonably hot day for England and Wales, with valley temperatures from Peak District into Wales up to 30C in afternoon. Also very warm sunshine southern and eastern Scotland, but still blustery south-westerly with low cloud and patchy drizzly rain northwest Scotland.

**Headline for Brecon Beacons**

Sunny and becoming unseasonably hot. Beware of dehydration and sunburn.

## Detailed Forecast for Monday, 25 May, 2026

<b>How windy? (On the summits)</b>	Southerly 5 to 10mph.
<b>Effect of wind on you?</b>	Negligible
<b>How wet? (Precipitation and its impact)</b>	<b>Dry</b>
<b>Cloud on the hills?</b>	<b>Mountains clear</b> Any early mist will soon disperse to leave the mountains clear.
<b>Chance of cloud free summits?</b>	<b>Greater than 90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Widespread and strong sunshine. Good visibility, but slight haze.
<b>How Cold? (at 750m)</b>	20C, very humid
<b>Freezing Level</b>	Well above the summits. Valley temperatures reaching 27 to 30C.

## Brecon Beacons - Looking Ahead

	<b>Tuesday 26 May</b>	<b>Wednesday 27 May</b>
<b>How windy? (On the summits)</b> <b>Effect of wind on you?</b>	Varying in direction, 5-10mph or less; perhaps locally up to 15mph some coastal hills where sea breezes develop. <b>Mostly negligible</b>	Southeasterly 15 to 25mph, but perhaps 35mph at times as marked gusts develop, with highest gusts not always on tops. <b>Blustery and increasingly gusty, with the highest wind gusts not necessarily over the higher slopes.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Risk isolated afternoon thunderstorm</b> Very likely dry, but risk of cloud bubbling up in the afternoon to give an isolated, but should they occur, slow-moving heavy shower or thunderstorm.	<b>Substantially or completely dry</b> Perhaps the odd burst of showery rain possible later in the day, running up the west coast.
<b>Cloud on the hills?</b>  <b>Chance of cloud free summits?</b>	<b>Mountains clear</b>  Perhaps some early fragments of mist and low cloud, mainly around coastal hills in the west. Otherwise, hills clear.	<b>Low cloud, mainly east, dispersing.</b>  Patches of banks of low cloud, mainly east Wales, will lift and break off the hills, to leave all areas clear by midday. Western mountains clear all day.  <b>90%, but 50% east Wales morning.</b>
<b>Sunshine?</b> Air clarity (below cloud)	Widespread sunshine, but areas of cloud will bubble up in the afternoon. Visibility mostly good, but marked haze.	Patchwork of sunshine, extensive western mountains. Visibility good, but marked haze.
<b>How Cold? (at 750m)</b>  <b>Freezing Level</b>	20C, very humid. Valley temperatures rising to high 20s.  Well above the summits	17 to 19C  Well above the summits

**Planning Outlook****All mountain areas of Britain from Tuesday, 26 May, 2026**

High pressure dominates this week with early patchy low cloud, mainly coastal hills dispersing to give widespread warm or very warm sunshine, still reaching into the high 20s on Tuesday Peak District into Wales with high humidity, which may spark off the odd thunderstorm, before peak daytime temperatures come down a little, when cooler for eastern hills. Chance of well scattered shower development from midweek as a gusty south-easterly develops for western hills. Pressure lowering next weekend into next week.

**Forecast issued at 16:40 on Sunday, 24 May, 2026**
