## General Summary for Wednesday, 10 June, 2026

### British Mountain Summary:

**Based on forecast chart for noon 10 June, 2026**

Showery westerlies, scattered bursts of rain moving eastward across the country, locally heavy with a chance of thunder, mainly eastern areas by afternoon. Improving to drier and brighter conditions for western England and Wales with time. Breezes tending to freshen. Feeling rather cool.

### Headline for Brecon Beacons

Showers easing. Moderate-to-strong breeze.

## Detailed Forecast for Wednesday, 10 June, 2026

<b>How windy? (On the summits)</b>	Westerly 20 to 25mph, some gusts 30mph over higher tops.
<b>Effect of wind on you?</b>	<b>Marked wind chill where exposed to the strongest breeze. Starting to affect ease of walking on some high tops.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Showers move east, fade with time</b> Showers initially western hills will develop more widely eastwards through morning, chance of thunder inland. By afternoon, a few bands of showers passing eastward, fading from west, leaving odd lighter showers later in day.
<b>Cloud on the hills?</b>	<b>Varying over tops, rising</b> Varying, but tops often covered through the day, especially western Cambrians in the morning. Breaks to tops best in afternoon away from showers.
<b>Chance of cloud free summits?</b>	<b>40% rising to 70% afternoon</b>
<b>Sunshine? Air clarity (below cloud)</b>	Variable cloud and patchy sun, best sun early in day eastern areas, then sunnier later in day near coasts. Visibility mostly good, but poor in showers.
<b>How Cold? (at 750m)</b>	5C lifting to 7C. Feeling like -3C directly in the wind.
<b>Freezing Level</b>	Above the summits

## Brecon Beacons - Looking Ahead

	Thursday 11 June	Friday 12 June
<b>How windy? (On the summits)</b>	Southwest turning westerly 35 to 45mph, at times 50mph higher mountains.	Westerly 20 to 30mph.
<b>Effect of wind on you?</b>	<b>Challenging walking conditions in exposure on high terrain, frequent buffeting. Considerable wind chill.</b>	<b>Blustery over the hills, more strenuous in places where exposed. Feeling cool despite fairly mild air.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Persistent rain, some heavy</b> Rain arriving from before dawn, some steadier heavier falls for periods through the morning. May break up a little in afternoon, but still often raining, particularly western areas.	<b>Drizzle mostly west</b> Feeling damp over many western hills with drizzle in the air, most common western Cambrians. Patchier drizzle further south and eastwards, locally often dry.
<b>Cloud on the hills?</b>	<b>Extensive low cloud</b>  Blanket low cloud across the hills, to lower slopes south and western areas, highest bases further east, but rarely above 600m.	<b>Extensive, lowest west</b>  Persistent across the hills, foggy from lower elevations upward toward the west coast, cloud base rarely above 500m western Cambrians. Some higher bases east and southwards, occasional breaks above 600-700m.
<b>Chance of cloud free summits?</b>	<b>Below 10%</b>	<b>20%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Overcast and dull, murky toward coasts. Poor visibility much of day in rain.	Largely cloudy, glimpses of sun mostly east Wales. Misty toward west Wales hills, reduced widely in drizzle; better eastwards.
<b>How Cold? (at 750m)</b>	6C rising to 11C. Feeling like 0 to -5C directly in wind.	10 or 11C, slightly warmer if out of cloud by afternoon. Feeling near 0C where exposed to wind.
<b>Freezing Level</b>	Above the summits.	Above the summits.

**Planning Outlook****All mountain areas of Britain from Thursday, 11 June, 2026**

Damp westerly breezes on Friday will cloak most mountains in cloud and some drizzle, better conditions eastwards. Cool and strong westerlies persist in Scotland on Saturday, then warmer with lighter winds by Sunday. Some patchy rain remaining in west and northwest Scotland over the weekend. Pressure tends to rise from the south this weekend, bringing warmer air and drier conditions to England & Wales, although west coast mountains may hold onto cloud. Into next week, a mixed southwesterly pattern remains, windy at times with periods of rain, drizzle and low cloud most persistent in the west. Warmest in England and Wales, but cooler westerly air likely returns at times mid-late week. Higher pressure then shows more signs of expanding over the country by late next week bringing improving conditions.
