General Summary for Thursday, 9 July, 2026

British Mountain Summary:
Based on forecast chart for noon 9 July, 2026

Warm-to-hot sun for most, risk of sunburn and dehydration. Early sea fog on low slopes near west coasts of England and Wales, may briefly lift but soon dissipating. Varied cloud western Scottish Highlands, mostly Mull to Skye, little or none eastward; high tops in and around Lochaber above the cloud layer.

Headline for Brecon Beacons
 Hot sunshine; some early sea fog

Detailed Forecast for Thursday, 9 July, 2026

How windy? (On the summits)	Variable direction less than 10mph; some sea breezes and upslope gusts may form.
Effect of wind on you?	Negligible.
How wet? (Precipitation and its impact)	No rain expected
Cloud on the hills?	Hills clear Coastal fog may affect lowest slopes near the sea, possibly also some scattered mist inland valleys at dawn, any early hill cloud soon clearing for cloud-free hills.
Chance of cloud free summits?	Nearly certain
Sunshine? Air clarity (below cloud)	Extensive sunshine, a little thin high cloud around. Visibility very good, some low-level haze.
How Cold? (at 750m)	16C rising to 22 to 24C afternoon warmest eastern hill groups. Valley temperatures locally approaching 30C.
Freezing Level	Above the summits.

Brecon Beacons - Looking Ahead

	Friday 10 July	Saturday 11 July
How windy? (On the summits) Effect of wind on you?	Southeasterly or variable, 10-15mph or less; variable gusts forming afternoon, including upslope in lower areas. Small.	Northeasterly 10-20mph. Mostly small.
How wet? (Precipitation and its impact)	Any rain unlikely Late in the day, small chance of a very isolated spot of rain.	No rain expected
Cloud on the hills?	Hills clear	Hills clear
Chance of cloud free summits?	Practically certain	Above 90%
Sunshine? Air clarity (below cloud)	Strong sunshine, some thin high cloud, fair weather cloud building afternoon. Visibility good but some haze.	Extensive sunshine, some thin high cloud, patchy fair weather cloud building afternoon. Very good visibility.
How Cold? (at 750m) Freezing Level	20C at dawn, rising to 25C, very warm (valleys approaching 30C+) and rather humid especially west and south. Above the summits.	19 or 20C, rising to 23C, warmest on south slopes (valleys up to 29C). Above the summits.

Planning Outlook**All mountain areas of Britain from Friday, 10 July, 2026**

Staying warm in Scotland, hot for England and Wales into the weekend. High pressure shifts northward, facilitating a strengthening easterly wind across most areas. Some lingering cloud and rain over the Scottish Highlands on Friday and Saturday, some risk of heavier thundery bursts on Friday. The weekend is likely dry across England and Wales with fairly extensive sun, some sea fog beginning to affect northeastern hill groups later weekend.

Easterly wind will persist next week, sometimes quite strong England and Wales. Mostly sunny and quite hot, including Scottish Highlands. Low pressure south of the country may push showers into Wales, though confidence is low.

Otherwise, this hot and dry pattern is likely to persist until late next week, at least.

Forecast issued at 16:20 on Wednesday, 8 July, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
