General Summary for Tuesday, 3 November, 2026

British Mountain Summary:
Based on forecast chart for noon 3 November, 2026

Cloud drifts across most eastern mountains, more broken westwards; some highest summits in Scotland close to the top of a cloud sheet at times. Local spots of light rain. Light wind northern Scotland, easterly winds elsewhere, stronger over England & Wales. Sunniest toward all western coasts.

Headline for Brecon Beacons

Breezy, gusty; patchy cloud mostly east, sunnier west.

Detailed Forecast for Tuesday, 3 November, 2026

How windy? (On the summits)	East to northeasterly 25 to 30mph, very gusty in places around high tops, some increase to 30-35mph later in day.
Effect of wind on you?	**Blustery with considerable wind chill on exposed terrain, some strenuous walking higher up and gusts affecting balance.**
How wet? (Precipitation and its impact)	**A little drizzle east** Occasional drizzle mostly confined to eastern hills in the morning, fading. Further west, patchier or very little at all.
Cloud on the hills?	**Mostly eastern tops in morning** Cloud banks drifting over higher slopes most often toward the east of Wales , base around 700m; tending to thin a little during day. More broken cloud westwards, often clear toward Pembrokeshire.
Chance of cloud free summits?	**40% rising to 80%**
Sunshine? Air clarity (below cloud)	Fairly cloudy, occasional sun breaking through, more often west and southwest. Visibility good, slight haze mainly east.
How Cold? (at 750m)	5C, little change all day. Feeling like -5C directly in the wind.
Freezing Level	Above the summits.

Brecon Beacons - Looking Ahead

	Wednesday 4 November	Thursday 5 November
How windy? (On the summits)	Easterly 30 to 40mph, very gusty in places around some tops, elevated passes and locally down western slopes.	Easterly 25 to 40mph, very gusty around tops and some downslopes to west; tending to ease a little during day.
Effect of wind on you?	**Affecting comfortable walking on higher slopes, buffeting gusts in places making balance tricky. Considerable wind chill.**	**Strenuous walking over the hills, sudden buffeting in places including to some lower elevations; considerable wind chill.**
How wet? (Precipitation and its impact)	**Largely dry** Spots of light rain in the wind at times, mainly eastern hills in morning.	**Little or no rain** Rare spots in the wind, mostly eastern hills.
Cloud on the hills?	**Patches mostly morning** Capping higher slopes in the morning above 700m, most often east & mid Wales, but well broken southwestwards. Lifting higher, increasingly clearing.	**Mostly little, patches east** Patchy cloud drifting over some higher tops mainly in the morning and mostly toward east and mid-Wales, base around 700m. Well broken westwards, many hills often clear.
Chance of cloud free summits?	**70%**	**70%**
Sunshine? Air clarity (below cloud)	Patchy cloud and sun, best in west. Visibility good, though some haze especially eastern areas.	Sunshine best toward west Wales. Visibility very good.
How Cold? (at 750m)	3C. Feeling like -7 to -10C directly in the wind.	4C. Feeling like -5 to -8C directly in the wind.
Freezing Level	Just above freezing on highest summits.	Above the summits.

Planning Outlook

All mountain areas of Britain from Wednesday, 4 November, 2026

High pressure persists toward the north this week, maintaining quiet weather conditions. Easterly winds prevail, strongest during midweek over England & Wales, tending to lessen toward the weekend; wind often lighter and variable toward northern Scotland. Largely dry, local light showers or drizzle mostly in the east. Variable amounts of cloud covering hills, some higher Scottish tops emerging above an inversion at times. Sunnier and clearer near to western coasts. Generally just above freezing over the mountains, but local pockets of frost in shelter and in glens; toward the weekend, high Scottish tops dip just below freezing.
