Cairngorms NP and Monadhliath - Looking Ahead

	Monday 22 June	Tuesday 23 June
How windy? (On the Munros)	Southerly between 15 and possibly 25mph.	Southwesterly, in the range 25 to 40mph: probably strengthening through day,.
Effect of wind on you?	Fairly small	Mostly fairly small, although some buffeting on higher areas, particularly later in day.
How wet? (Precipitation and its impact)	Risk a few hours of rain (Low confidence) Moderate risk of 2 to 4 hours of mostly light rain - just the odd heavier burst.	Rain unlikely Just the risk of a patch of drizzle or burst of rain later in the day.
Cloud on the hills?	Low confidence: Often very little but may form for a few hours in/after rain. The hills often free of cloud in and after rain, higher slopes may be shrouded for a few hours.	Cloud may shroud higher summits late in day Most, perhaps all summits cloud free most or all day. Increasing risk toward evening mainly or only west of A9 of cloud shrouding areas above 750 to 1000m.
Chance of cloud free Munros?	60%	90% later 30%
Sunshine? Air clarity (below cloud)	Only glimpses of sun - through layers of high cloud.. Excellent visibility.	Sunshine will give way as cloud penetrates inland. Excellent visibility.
How Cold? (at 900m)	10C rising to 13 to 15C.	14 to 17C
Freezing Level	Above the summits	Above the summits.

Planning Outlook

All mountain areas of Britain from Monday, 22 June, 2026

Extensively dry, very warm but very humid indeed England and Wales, although around Monday chance of a thunderstorm. Rain and low cloud at times Scotland, mainly affecting western mountains - although later next week the warmth encroaching into Scotland. There may well be widespread thunderstorms later in the week, before less hot weather extends from the Atlantic around next weekend.
