Lake District - Looking Ahead

	Friday 20 September	Saturday 21 September
How windy? (On the summits)	Easterly 15 to 20mph, on highest peaks in the east gusts 30-35mph possible.	East to northeasterly, 15-20mph.
Effect of wind on you?	Small, but may be surprisingly gusty in the east to affect balance on high ridges.	Small.
How wet? (Precipitation and its impact)	Rain very unlikely Low risk of the odd burst of rain.	No rain expected
Cloud on the hills?	May form at times, particularly east Cumbria The mountains cloud free all day. However, very low cloud or valley fog, top of which likely to be below 400m morning. Lifting to briefly cover higher slopes during the day.	Hills clear Morning fog in some valleys, especially around lakes and rivers. Most likely dispersing early.
Chance of cloud free summits?	80%	Almost certain except for morning fog
Sunshine? Air clarity (below cloud)	Bright sunshine and excellent visibility higher fells; sometimes foggy lower slopes, most likely east Cumbria.	Sunny, very good visibility but reduced through haze in the air.
How Cold? (at 750m)	14C, but very much colder, perhaps only 7C, where in cloud.	12 to 14C
Freezing Level	Above the summits.	Above the summits.

Planning Outlook**All mountain areas of Britain from Friday, 20 September, 2024**

High pressure conditions with a lot of sunshine, warm temperatures and calm winds will continue until early next week in Scotland and northern England. In Wales and Peak District from Friday onward mix of sun and clouds, with locally heavy showery bursts of rain, possibly isolated thunder.

Beginning of next week showers possible also northern England and parts of Scotland, although Highlands still mostly dry and sunny until mid next week. Then, weather conditions may deteriorate across all British mountains with cooling and strong winds, although further development uncertain.

Forecast issued at 13:25 on Wednesday, 18 September, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
