

# Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

**Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to [www.wheelwrights.com](http://www.wheelwrights.com)**

## General Summary for Thursday, 31 October, 2024

### British Mountain Summary:

**Based on forecast chart for noon 31 October, 2024**

Widely murky, mostly overcast skies but dry, only in western Scotland drizzle. Mild, but severe wind make it feel cold in Scotland. Marked increase of wind speed with height in the north, severe gales over Scottish mountains. In Wales lot of sunshine above very low clouds.

### Headline for Lake District

Windy, cloudy and dull, extensively dry, mild

## Detailed Forecast for Thursday, 31 October, 2024

<b>How windy? (On the summits)</b>	Southwesterly, widely 20-30mph, less in the south. On some higher passes gusts may exceed 40mph.
<b>Effect of wind on you?</b>	<b>Blustery, walking impeded, gusts may locally throw you off balance. Significant wind chill.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Little or no rain</b> Drizzly showers not fully ruled out, but most likely dry.
<b>Cloud on the hills?</b>	<b>Extensive, chance for clear tops</b> Cloud fairly persistent in the valleys and on lower fells. Above 600-700m chance for clear spells, but most of the day also highest tops covered.
<b>Chance of cloud free summits?</b>	<b>40%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Overcast and murky most or all day. If not in cloud visibility excellent, but mostly cloud making visibility poor.
<b>How Cold? (at 750m)</b>	10 to 13C. With wind chill feels like below 5C.
<b>Freezing Level</b>	Above the summits.

**Lake District - Looking Ahead**

	<b>Friday 1 November</b>	<b>Saturday 2 November</b>
<b>How windy? (On the summits)</b>	Starting west to southwesterly, 25 to 35mph. Gradually easing to 10-20mph.	Variable, mostly southwesterly, 5 to 15mph.
<b>Effect of wind on you?</b>	<b>Blustery in the morning, comfortable walking impeded. Becoming small.</b>	<b>Negligible.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Low risk rain afternoon</b> Chance for a little rain in the afternoon in northern Lakes.	<b>No rain expected</b>
<b>Cloud on the hills?</b>	<b>Hills covered, some tops clear at start</b>  Low cloud covering hills from lower slopes or valley bottoms upward, highest fells at times (in the morning) cloud-free, during the day cloud developing on various levels.	Hills covered in cloud, most likely from 600-800m upward at start, but low cloud may also cover valleys. Cloud slowly lifting, may partly break. Chance for higher cloud base toward High Street.
<b>Chance of cloud free summits?</b>	<b>30%</b>	
<b>Sunshine?</b> Air clarity (below cloud)	Clouds coming and going, most of the time only weak sunshine. Excellent visibility if not in cloud.	Glimpses of sunshine, but generally cloudy.  Very good visibility if not in cloud.
<b>How Cold? (at 750m)</b>	Around 10C	7 to 10C
<b>Freezing Level</b>	Above the summits.	Above the summits.

**Planning Outlook**

**All mountain areas of Britain from Friday, 1 November, 2024**

After wet Friday in Scotland, back to high pressure for the weekend and beginning of next week. Inversion conditions developing mean locally very misty or cloudy, and tops sometimes above cloud. Southwesterly winds, dry and mild conditions. Such scheme holds until mid next week, when a weak front passage will probably deteriorate weather for a day, at least in Scotland. Later another few days of often cloudy, but dry and warm weather. Winds may speed up again end of next week.

**Forecast issued at 16:02 on Wednesday, 30 October, 2024**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
