

Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Friday, 1 November, 2024

British Mountain Summary:

Based on forecast chart for noon 1 November, 2024

Widely dull and overcast, in Highlands frequent rain, especially in the north, where windy at start. Mostly mild or warm. In England and Wales isolated spots of drizzle possible, but generally dry. Best chances for sun in northern Scotland in the afternoon, after the rain has passed.

Headline for Lake District

Widely dry, mild and breezy. Mostly cloudy

Detailed Forecast for Friday, 1 November, 2024

How windy? (On the summits)	Starting west to southwesterly, 20 to 30mph. Gradually easing to 10-20mph.
Effect of wind on you?	Blustery in the morning, comfortable walking impeded. Becoming small.
How wet? (Precipitation and its impact)	Locally early drizzle Very locally morning drizzle, but widely dry.
Cloud on the hills?	Hills covered, some tops clear at start Low cloud covering hills from lower slopes or valley bottoms upward, highest fells at times (in the morning) cloud-free, during the day cloud developing on various levels.
Chance of cloud free summits?	30%
Sunshine? Air clarity (below cloud)	Most of the time overcast, one or two sunny hours possible toward Kendal. Excellent visibility if not in cloud, but most of the time dull due to cloud.
How Cold? (at 750m)	Around 10C
Freezing Level	Above the summits.

Lake District - Looking Ahead

	Saturday 2 November	Sunday 3 November
How windy? (On the summits)	Variable, mostly southwesterly, 5 to 15mph.	Mostly south or southeasterly, 10 to 20mph.
Effect of wind on you?	Negligible.	Small.
How wet? (Precipitation and its impact)	Rain unlikely Risk occasional drizzle from low cloud.	No rain expected
Cloud on the hills?	Firstly extensive, may break, likeliest east Hills covered in cloud, most likely from 600-800m upward at start, but low cloud may also cover valleys. Cloud slowly lifting, may partly break. Chance for higher cloud base toward High Street.	Cloud in the valleys, clear higher up Low cloud and fog in the valleys, from mid-slopes upward clear. Lower down cloud may persist the whole day.
Chance of cloud free summits?	40%	70%
Sunshine? Air clarity (below cloud)	Glimpses of sunshine, but generally cloudy. Very good visibility if not in cloud.	Plenty of sunshine and excellent visibility if above the cloud.
How Cold? (at 750m)	7 to 10C	Around 10C
Freezing Level	Above the summits.	Above the summits.

Planning Outlook**All mountain areas of Britain from Saturday, 2 November, 2024**

Back to high pressure conditions for the weekend and beginning of next week. Inversion developing means often very misty or cloudy, but tops sometimes above cloud - especially the Munros. Southwesterly winds, dry and mild conditions. Such scheme holds until mid next week, when a weak front passage will probably deteriorate weather for a day, at least in Scotland. Later another few days of often cloudy, but dry and even warmer weather. Winds may speed up again end of next week.

Forecast issued at 15:44 on Thursday, 31 October, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
