

Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Sunday, 2 November, 2025

British Mountain Summary:

Based on forecast chart for noon 2 November, 2025

Showery westerly winds, reaching gale force Scottish Highlands where cold enough for snow on higher tops. The rain will be almost constant NW Highlands, whilst from southern Scotland southward, showers will become well scattered. Least windy south Wales.

Headline for Lake District

Wind near gale higher slopes. Showers. Cold.

Detailed Forecast for Sunday, 2 November, 2025

How windy? (On the summits)	West to southwesterly 30mph; generally least windy post dawn.
Effect of wind on you?	Strenuous walking - stability sometimes difficult where exposed on higher summits. Considerable wind chill.
How wet? (Precipitation and its impact)	Showers, mainly morning Showers, perhaps frequent on some fells for an hour or two morning. Frequently dry by afternoon.
Cloud on the hills?	Frequently covering higher tops Cloud widely covering the fells after dawn. Cloud base will rise through morning to around 750m, but temporarily lower near showers.
Chance of cloud free summits?	20%
Sunshine? Air clarity (below cloud)	Patchy sunshine, mainly eastern fells. Hazy..
How Cold? (at 750m)	3C. Will feel as cold as minus 10C directly in the wind.
Freezing Level	Above the summits

Lake District - Looking Ahead

	Monday 3 November	Tuesday 4 November
How windy? (On the summits)	Southwesterly 45-50mph.	South to higher up southwesterly 40 to 50mph.
Effect of wind on you?	Difficult walking and significant wind chill where exposed on higher tops.	Continued difficult conditions where exposed on higher areas, where wind chill will be significant and walking a struggle.
How wet? (Precipitation and its impact)	Frequent rain, particularly south lakes Frequent or almost incessant rain, often heavy; a risk of flooding with rivers in spate. Generally least wet north lakes.	Frequent or persistent rain. Rain most or all day. Breaks in the rain most likely north lakes. Very wet underfoot and streams in spate - possible flooding.
Cloud on the hills?	Extensive Most fells persistently shrouded down to lower slopes, Higher cloud bases near Haweswater and Ullswater but unlikely to lift above 600-700m.	Very extensive. Widely persistent fog above 200 to 400m. Toward north and northeastern fells, higher cloud base, may reach 650m.
Chance of cloud free summits?	Almost nil	10%
Sunshine? Air clarity (below cloud)	Dull and misty or foggy.	Little if any sun: mostly dull and misty.
How Cold? (at 750m) Freezing Level	9 or 10C. Minimal change with added height. Feeling below freezing in exposure to wind. Above the summits	8C Will feel as cold as minus 2C directly in the wind. Above the summits.

Planning Outlook

All mountain areas of Britain from Monday, 3 November, 2025

A series of deep Atlantic lows and associated fronts will continue to cross Britain over the next week to ten days. Frequently windy, and high rainfall, particularly on western mountains (rain at some stage almost daily) and cloud will frequently cover higher areas. Only rarely cold enough for snow higher mountains in Scotland.
