

Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Monday, 24 November, 2025

British Mountain Summary:

Based on forecast chart for noon 24 November, 2025

Turning cold from north and extensively windy behind an area of low pressure centred over SE England. Snow and hail showers will affect N & E Scotland, whilst further south patchy rain (sleet highest summits), but total rainfall small.

Headline for Lake District

Showers; sometimes frequent upland wind close to gale.

Detailed Forecast for Monday, 24 November, 2025

How windy? (On the summits)	Northerly, 40mph.
Effect of wind on you?	Walking arduous or in places difficult, particularly near precipitation, where in gusty conditions, balance tricky and wind chill significant.
How wet? (Precipitation and its impact)	Showers Occasional showery rain, or above 700m sleet or snow, most likely eastern and northern fells. Total rainfall small.
Cloud on the hills?	Becoming confined to, but may well not clear, higher summits In the morning cloud shrouding higher fells widely, particularly north lakes where few breaks above 600m. Gradually cloud becoming confined to higher tops, but across N Lakes cloud may not lift above 750m or 900m elsewhere.
Chance of cloud free summits?	20% north to 60% south by afternoon
Sunshine? Air clarity (below cloud)	Patches of sunshine gradually coming through, mainly southern and western fells. Visibility very good.
How Cold? (at 750m)	Around 2C - a marginal drop likely through the day Will feel as cold as minus 10C directly in the wind.
Freezing Level	Above the summits - although close to freezing point above 900m by late afternoon.

Lake District - Looking Ahead

	Tuesday 25 November	Wednesday 26 November
How windy? (On the summits)	Northerly perhaps 30mph at first; but easing toward 15mph in a lull.	Southwesterly soon 40 to 50mph.
Effect of wind on you?	Considerable buffeting and wind chill after dawn, but will become small through afternoon.	Extensively difficult walking where exposed with sudden powerful gusts and significant wind chill.
How wet? (Precipitation and its impact)	Precipitation very unlikely	Rain and drizzle on and off Rain and drizzle gradually spreading inland (sleet highest tops temporarily morning). The rain heaviest and very frequent south lakes and western fells elsewhere; total rainfall small elsewhere.
Cloud on the hills?	Varied; some higher tops clearing, others remaining in cloud. Generally, cloud base 800m or above.	Fells filling in with fog; lowest base south and west Some higher slopes may initially be cloud free. Will deteriorate, across south lakes and western fells elsewhere, cloud widely below 300-450m. Elsewhere, slowly filling in across higher slopes, typically 500 to 700m afternoon.
Chance of cloud free summits?	60%	Dropping to less than 10%
Sunshine? Air clarity (below cloud)	Bright sunshine, most widely south lakes. The air very clear so excellent visibility, but fog some valleys and higher slopes.	Glimpses of weak sunshine lower slopes north lakes; becoming extensively dull and misty as visibility drops in rain.
How Cold? (at 750m)	1C	1C rising to 5C. Will feel as cold as minus 12C directly in the wind.
Freezing Level	Around 750m, rising slowly through day. Frost many valleys morning.	Locally 900m at first; rising above the summits, probably during morning. Frost many valleys at dawn.

Planning Outlook**All mountain areas of Britain from Tuesday, 25 November, 2025**

As a series of deep Atlantic lows pass north of or across Britain, rainfall be become high particularly on western mountains together with frequent upland gales and low cloud. In Scotland, temperatures on the Munros will sometimes be below freezing point, but fresh snow transient, whereas elsewhere, snow rare, if any.

Forecast issued at 13:59 on Sunday, 23 November, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
