# Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

**Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com**

## General Summary for Monday, 2 November, 2026

**British Mountain Summary:**
**Based on forecast chart for noon 2 November, 2026**

Light winds for much of the Highlands; a stronger northeasterly breeze for England & Wales, particularly toward the south, feeling chilly. Generally dry, sunshine best in southern Scotland and toward the Irish Sea coast. Some cloud banks in northern Scotland, but high mountains may poke out above this.

**Headline for Lake District**

Moderate breeze. Sunshine and patchy cloud.

## Detailed Forecast for Monday, 2 November, 2026

| | |
|---|---|
| **How windy? (On the summits)** | Northeasterly 15 to 20mph, rising slightly to 25mph at times around higher fells, more often southern areas later in day. |
| **Effect of wind on you?** | **Fairly small, but feeling chilly over exposed slopes and locally more noticeably breezy later.** |
| **How wet?** (Precipitation and its impact) | **Rain not expected** |
| **Cloud on the hills?** | **Mostly little, rare patches**<br>Patchy cloud sometimes grazes higher slopes mainly north/east areas from Skiddaw to High Street, well broken westward. Many fells often clear. |
| **Chance of cloud free summits?** | **90%** |
| **Sunshine?** Air clarity (below cloud) | Sunshine and a little cloud drifting in from east at times.<br>Visibility very good, some haze lower down. |
| **How Cold? (at 750m)** | 3 or 4C.<br>Feeling nearer -5C directly in wind. |
| **Freezing Level** | Above the summits, but patchy frost in valleys at first, also some sheltered higher slopes. |

**Lake District - Looking Ahead**

| | Tuesday 3 November | Wednesday 4 November |
|---|---|---|
| **How windy? (On the summits)**<br><br>**Effect of wind on you?** | East to northeasterly 20 to 25mph, some gusty areas 30mph around higher fells and some elevated passes.<br>**Starting to affect comfortable walking on exposed terrain and some more noticeable gustiness affecting balance. Feeling chilly.** | Easterly 20 to 30mph, locally varying, but gusty in places around higher fells and elevated passes.<br>**Affecting ease of walking on exposed higher slopes, gusts affecting balance in places. Marked wind chill.** |
| **How wet?**<br>(Precipitation and its impact) | **A little drizzle**<br>Occasional patches of drizzle drifting in from the east, but most places often dry. | **Largely dry**<br>Spots of light rain in the wind at times. |
| **Cloud on the hills?**<br><br><br><br><br><br>**Chance of cloud free summits?** | **Capping some tops, but breaks likely**<br><br>Cloud banks drifting across some upper slopes mostly above 700m and mainly north and eastern fells from Skiddaw to High Street groups. Well broken westwards and breaking fairly widely during day.<br><br>**50%** | **Occasional patches**<br><br>Grazing higher fells occasionally, mostly above 700-800m, but well broken westwards, often lifting higher.<br><br>**70%** |
| **Sunshine?**<br>Air clarity (below cloud) | Fairly cloudy, occasional sun breaking through, mostly western areas.<br>Visibility very good. | Sunshine best west, patchy cloud east.<br>Visibility very good. |
| **How Cold? (at 750m)**<br><br>**Freezing Level** | 5C, little change with added height.<br>Feeling like -3C directly in the wind.<br><br>Above the summits. | 4C.<br>Feeling like -5C directly in the wind.<br><br>Above the summits, but frost pockets around dawn in some sheltered valleys. |

## Planning Outlook

**All mountain areas of Britain from Tuesday, 3 November, 2026**

A settled week ahead as high pressure resides toward the north. Easterly winds will prevail, strongest for Wales and the southern Pennines. Largely dry weather, whilst variable cloud will be drawn in from the North Sea, at times some light showers in eastern areas. Best chance for inversion conditions will be on higher tops in Scotland, emerging above cloud at times. Sunshine typically best toward western coasts. Temperatures mostly above freezing on high terrain, but some frost overnight in glens and some upland hollows; then cooler toward the weekend on tops. Quiet weather also likely as next weekend begins, perhaps further ahead, though a mixed Atlantic influence may return to Scotland.

**Forecast issued at 16:00 on Sunday, 1 November, 2026**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
