Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Sunday, 8 November, 2026

British Mountain Summary:
Based on forecast chart for noon 8 November, 2026

Patchy drizzle and areas of low cloud or fog, mostly east and southern Scotland, Pennines and inland across Wales, whilst western regions tend to fare better for cloud breaks and some sun. Very little wind overall. Near freezing on highest Scottish tops.

Headline for Lake District

Mix of cloud and fog, a little dampness.

Detailed Forecast for Sunday, 8 November, 2026

How windy? (On the summits)	Variable 5mph or less.
Effect of wind on you?	**Negligible**
How wet? (Precipitation and its impact)	**Patchy drizzle** Local pockets of light drizzle, perhaps a brief light shower areas closest to the coast.
Cloud on the hills?	**Extensive; cloud base sometimes very different on nearby slopes** Some local variations, but cloud likely extensive or persistent above 700m. Lower down, fog clinging to many slopes from valleys up most or all day, whilst others are fog free or between layers of cloud. Generally least fog northwestern fells.
Chance of cloud free summits?	**10%**
Sunshine? Air clarity (below cloud)	Varied cloud or fog - some areas brighter with glimpses of sun and very good visibility developing through day.
How Cold? (at 750m)	4C
Freezing Level	Above the summits.

Lake District - Looking Ahead

	Monday 9 November	Tuesday 10 November
How windy? (On the summits) **Effect of wind on you?**	Easterly 10mph, or less early in the day, rising a little to 10-15mph afternoon, or slightly stronger from dusk. **Small**	Southeasterly 20 to 25mph, gusty around west and southwestern fells in particular, may reach 30mph in places. **Starting to affect comfortable walking on some slopes, gusty spots affecting balance locally and feeling chilly.**
How wet? (Precipitation and its impact)	**No rain expected**	**Rain unlikely** Chance of odd spots if high cloud thickens toward south.
Cloud on the hills? **Chance of cloud free summits?**	**Varied low cloud, west may be clear** Some uncertainty, but cloud banks likely around high terrain, plus areas of fog in the valleys. Some slopes may be clearer between fog layers. May break up to be clearer overall, but particularly in west. **50%**	**Some fog or cloud, but may be clear fells** Patchy cloud banks, plus fog on some lower slopes. Many fells may be often clear, or some slopes between cloud layers for periods. **60%**
Sunshine? Air clarity (below cloud)	Some sun breaking through, best in west. Generally hazy lower down, locally foggy, some improvements in west.	Sun fairly weak through high cloud. Visibility good, but some haze likely.
How Cold? (at 750m) **Freezing Level**	3C. Above the summits, but patchy frost some inland valleys early morning.	4C. Feeling nearer -5C directly in the wind. Above the summits, but slight frost likely in sheltered valleys early morning.

Planning Outlook

All mountain areas of Britain from Monday, 9 November, 2026

A slack pressure pattern to start the new week over Scotland, maintaining varied low cloud and fog. Lowering pressure to the south and an increasing easterly wind for England & Wales. Rain pushes into Wales on Tuesday, reaching the south Pennines with time, persisting in these areas into Wednesday, but very little extending further northwards. Into the second half of the week, a switch to a colder northerly flow will likely drop the freezing level to 800m increasingly widely for Thursday-Friday, plus frost on low ground. Some snow showers on northern Scottish mountains, but largely dry weather elsewhere. During next weekend, a shift to a less cold Atlantic influence - a changeable mix likely into the following week.

Forecast issued at 15:00 on Saturday, 7 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
