# Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

**Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com**

## General Summary for Tuesday, 10 November, 2026

**British Mountain Summary:**
**Based on forecast chart for noon 10 November, 2026**

Much of Scotland dry with sunshine; areas of low-level fog and frost. Some showers toward the far north. Fog from lower elevations upward for Pennines and east Wales, but much of northwest Wales and the Lakes have clearer hills. Rain moves into south Wales. Strong easterly winds for Wales.

**Headline for Lake District**

Fells mostly clear, hazy sun. Local gusty wind.

## Detailed Forecast for Tuesday, 10 November, 2026

| | |
|---|---|
| **How windy? (On the summits)** | Southeasterly 15 to 20mph, some gusts 25mph southern fells mainly afternoon. |
| **Effect of wind on you?** | **Fairly small, some more noticeable gusts develop in places.** |
| **How wet?** (Precipitation and its impact) | **Rain not expected** |
| **Cloud on the hills?** | **Some fog or patchy cloud, many fells clear**<br>Patchy cloud banks, plus fog on some lower slopes. Many fells often clear, or some slopes between cloud layers for periods. |
| **Chance of cloud free summits?** | **70%** |
| **Sunshine?** Air clarity (below cloud) | Sun fairly weak through high cloud.<br>Visibility good, but some haze likely. |
| **How Cold? (at 750m)** | 3C.<br>Feeling like -3C in stronger wind. |
| **Freezing Level** | Above the summits, but frost in sheltered valleys early morning. |

**Lake District - Looking Ahead**

| | Wednesday 11 November | Thursday 12 November |
|---|---|---|
| **How windy? (On the summits)** | Easterly 15 to 20mph, gusts 25mph or locally stronger early in day. Tending to drop lighter and variable afternoon. | Northerly 25 to 30mph, occasional 35mph higher fells. |
| **Effect of wind on you?** | **Some gusty areas may start to affect ease of walking on exposed terrain in morning, but becoming small.** | **Affecting comfortable walking on exposed high terrain, strenuous in places and gusts affect balance. Considerable wind chill.** |
| **How wet?** (Precipitation and its impact) | **Very likely dry** | **No precipitation expected** |
| **Cloud on the hills?** | **Patchy cloud, clearer west & south**<br><br>Some patches of cloud drifting over higher slopes, mostly from Skiddaw to Helvellyn and High Street area, but southwestwards often very little and may widely often clear. | **None expected** |
| **Chance of cloud free summits?** | **70%, to 90% western tops** | **Above 90%** |
| **Sunshine?** Air clarity (below cloud) | Mostly sunny, some patchy cloud. Visibility excellent, possibly some low-level fog early in the day. | Extensive sunshine. Visibility excellent. |
| **How Cold? (at 750m)** | 2 or 3C. Feeling like -5C in the wind in the morning. | Around 0C. Feeling like -10C directly in the wind. |
| **Freezing Level** | Close to freezing on higher summits with some high terrain frozen, also frost in sheltered valleys in the morning. | 700-800m. Frost widely in valleys in morning, all day out of sunlight. |

## Planning Outlook

**All mountain areas of Britain from Wednesday, 11 November, 2026**

Dropping colder across all mountains during midweek as the wind shifts northerly and strengthens. Some showery snowfall across the Highlands on Wednesday, otherwise plenty of sunshine and very clear air late this week, for all areas - clearing away fog from early in the week. Into the weekend, as the wind shifts west then southwesterly, less cold air drifts in from the Atlantic bringing more cloud onto western hills - an increasing risk of rain in the west. A changeable outlook into next week with varying temperatures, stronger wind at times, rain and some upland snow possible. Unsettled patterns are more likely to prevail beyond mid-month.

**Forecast issued at 16:05 on Monday, 9 November, 2026**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
