Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Wednesday, 11 November, 2026

British Mountain Summary:
Based on forecast chart for noon 11 November, 2026

Many places stay dry all day with sunshine and broken cloud. Below freezing on Scottish tops. A band of rain and hill snow moves into northern Scotland during the day, plus a strengthening northwesterly wind. Easterly winds for Wales, light rain in the south fizzles out, but leaves low cloud and dampness.

Headline for Lake District

Dry with sun, most fells clear; wind drops light.

Detailed Forecast for Wednesday, 11 November, 2026

How windy? (On the summits) **Effect of wind on you?**	Easterly 15 to 20mph early morning, soon dropping light and variable onward into middle of day and afternoon. From dusk, becoming northerly rising during night toward 30mph. **Mostly small.**
How wet? (Precipitation and its impact)	**No precipitation expected**
Cloud on the hills? **Chance of cloud free summits?**	**Patchy cloud, clearer west & south** Some patches of cloud drifting over higher slopes, mostly from Skiddaw to Helvellyn and High Street area, but southwestwards often very little and widely often clear. **70%, to 90% western tops**
Sunshine? Air clarity (below cloud)	Mostly sunny, some patchy cloud. Visibility excellent, possibly some low-level fog early in the day.
How Cold? (at 750m) **Freezing Level**	2 or 3C. Close to freezing on higher summits with some high terrain frozen, also frost in sheltered valleys in the morning.

Lake District - Looking Ahead

	Thursday 12 November	Friday 13 November
How windy? (On the summits)	Northerly 25 to 30mph, occasional 35mph higher fells.	Northwesterly, turning westerly by dusk, 15mph to often 20mph on higher fells.
Effect of wind on you?	**Affecting comfortable walking on exposed high terrain, strenuous in places and gusts affect balance. Considerable wind chill.**	**Fairly small effect on walking, but marked wind chill on exposed terrain.**
How wet? (Precipitation and its impact)	**No precipitation expected**	**Substantially dry** Chance of an odd light shower drifting onto coastal fells in the west, mainly afternoon.
Cloud on the hills?	**None expected**	**Most likely none** Small chance of brief patches drifting onto higher coastal tops at times.
Chance of cloud free summits?	**Above 90%**	**90%**
Sunshine? Air clarity (below cloud)	Extensive sunshine. Visibility excellent.	Extensive sunshine, some patchy cloud may drift in from the west later. Visibility excellent.
How Cold? (at 750m)	Around 0C. Feeling like -10C directly in the wind.	-1C rising to +1C. Wind chill feeling like -5 to -7C.
Freezing Level	700-800m. Frost widely in valleys in morning, all day out of sunlight.	Much terrain frozen from dawn with frost all day out of sunlight, otherwise tending to lift to around 900m during the day.

Planning Outlook

All mountain areas of Britain from Thursday, 12 November, 2026

Chillier in the second half of this week with frost widely, but much clearer conditions for all with sunshine. Into the weekend, as the wind shifts west then southwesterly, less cold air drifts in from the Atlantic bringing more cloud onto western hills - some rain mainly in western Scotland, whilst England and Wales may remain largely dry for the weekend. A changeable outlook into next week with varying temperatures, stronger wind at times, rain and some upland snow possible. Unsettled patterns are more likely to prevail beyond mid-month.

Forecast issued at 15:25 on Tuesday, 10 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
