British Mountain Summary:

Based on forecast chart for noon 23 October, 2021

Increasingly very windy, gales developing on most tops, severe gales higher mountains in Scotland. Drizzly rain on most southwest facing hills, plus steadier rain setting in for western Scotland afternoon onward. Milder, above freezing up to highest summits.

Headline for Peak District

Increasingly windy on the hills. Generally dry.

Detailed Forecast for Saturday, 23 October, 2021

How windy? (On the summits)	South to southwesterly, strengthening from 20mph in the morning, to 30-35mph during the afternoon.
Effect of wind on you?	Will increasingly impede walking through the day with marked buffeting developing.
How wet? (Precipitation and its impact)	No rain expected
Cloud on the hills?	Very little Perhaps a few patches on tops early in the day, but otherwise clear.
Chance of cloud free summits?	70% rising above 90%
Sunshine? Air clarity (below cloud)	Patches of sun, but high level cloud increasing from the west. Visibility very good.
Temperature (at 600m)	7C. Wind chill where exposed to strongest winds on tops feels close to freezing.
And in the valleys	5C at dawn, rising to 10 to 12C.

Peak District - Looking Ahead

	Sunday 24 October	Monday 25 October
How windy? (On the summits) Effect of wind on you?	South to southwesterly, 35 perhaps 45mph for a few hours in the morning, likely to lessen by afternoon to 25mph. A generally very blustery day, but for several hours, walking conditions may be arduous on higher tops and near edges.	Southwesterly 15 to 25mph. Ease of walking impeded at times, feeling chilly where exposed on higher terrain.
How wet? (Precipitation and its impact)	Rain likely for several hours Rain soon spreading in from the west in the morning likely to become persistent for a few hours, heaviest in western areas. Breaking up into the afternoon, but showery bursts may follow.	Mainly dry Chance of an odd shower coming in from the west.
Cloud on the hills? Chance of cloud free summits?	Lowering in rain Initially varied cloud banks on the hills, may largely lift and break up for a time. However, as rain moves in, cloud will lower onto the hills, perhaps filling in widely above 500m, patches below 400m in west. 60%, dropping to 20% in rain.	Often above hills Occasional banks of cloud on higher terrain above about 500m in morning, but mostly lifting above the hills. 70%
Sunshine? Air clarity (below cloud)	Mostly cloudy, a little sun may break through during afternoon. Visibility sometimes good, but poor in rain.	Fairly cloudy, some sun, best toward east. Visibility mostly very good.
Temperature (at 600m) And in the valleys	7 to 9C 9C at dawn, rising to around 13C afternoon, lowering if rain moves in.	5 to 7C 6C at dawn, rising to around 11C through middle of day.

Planning Outlook**All mountain areas of Britain from Sunday, 24 October, 2021**

A front advances eastward on Sunday, followed by a cool, blustery and showery pattern onward into Monday. Temperatures will vary during next week - highest Scottish summits will temporarily dip close to freezing point, but it will be often mild as southwesterlies prevail. Periods of gales or severe gales on the mountains. Frequent rain, some sustained heavy falls focused on western Scotland where flooding is possible through midweek. Less wet further south and east.

Forecast issued at 7:58 on Saturday, 23 October, 2021
