Chance of cloud free summits?	40%
Sunshine? Air clarity (below cloud)	Grey and dull particularly in west. Toward east, some glimpses of sun especially afternoon and good visibility below cloud.
Temperature (at 600m)	8 to 11C.
And in the valleys	10C from dawn, rising to 14C.

Peak District - Looking Ahead

	Wednesday 30 October	Thursday 31 October
How windy? (On the summits)	Southwesterly, 10 to 20mph or less.	Variable, 10mph or less.
Effect of wind on you?	Negligible.	Negligible.
How wet? (Precipitation and its impact)	No rain expected	No rain expected
Cloud on the hills?	Hills mostly covered Low cloud from lower slopes upward, covering most or all hills. During the day cloud slowly thinning, clearing parts of the National Park.	Extensive, tops may be above cloud Cloud fairly persistent in the valleys and on most fells. Highest peaks (above 600m) may stay above the clouds at times.
Chance of cloud free summits?	40%	20%
Sunshine? Air clarity (below cloud)	Weak sunbeams coming through clouds. At start perhaps sunny some tops above cloud. Mostly poor visibility.	Very sunny and excellent visibility if above the cloud. However, most frequent in cloud, murky with poor visibility.
Temperature (at 600m)	9 to 11C	9 to 13C.
And in the valleys	9C at dawn rising to 13C	10 to 14C, rising only a little through the day.

Planning Outlook**All mountain areas of Britain from Wednesday, 30 October, 2024**

West to southwesterlies prevail with high pressure extending across Britain for rest of the week, keeping dry conditions for most, although some rain may continue to affect northwest Scotland. Low cloud fairly widespread, some fog into valleys, with local inversion conditions developing. On Friday chillier northwesterly air is likely over the Highlands, dropping to freezing over higher Scottish mountains, some showers with snow - elsewhere dry and staying mild. Later back to west and southwesterlies, high pressure shows signs of keeping most of Britain dry until end of next week.
