

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Thursday, 31 October, 2024

British Mountain Summary:

Based on forecast chart for noon 31 October, 2024

Widely murky, mostly overcast skies but dry, only in western Scotland drizzle. Mild, but severe wind make it feel cold in Scotland. Marked increase of wind speed with height in the north, severe gales over Scottish mountains. In Wales lot of sunshine above very low clouds.

Headline for Peak District

Murky on lower terrain, higher up clear. Dry, warm, locally gusty

Detailed Forecast for Thursday, 31 October, 2024

How windy? (On the summits)	Variable, mostly westerly 10 to 20mph, in southernmost part of National Park 10mph or less. May be gusty north of Kinder Scout.
Effect of wind on you?	Fairly small, in places negligible.
How wet? (Precipitation and its impact)	No rain expected
Cloud on the hills?	Extensive on lower terrain. Cloud fairly persistent in the valleys and on lower hills. Gradually increasing chances for cloud-free hills with height, above 500m likely long clear spells.
Chance of cloud free summits?	50%
Sunshine? Air clarity (below cloud)	Overcast and murky most or all day. If not in cloud visibility excellent, but mostly cloud making visibility poor.
Temperature (at 600m)	10 to 13C.
And in the valleys	10 to 14C, rising only a little through the day.

Peak District - Looking Ahead

	Friday 1 November	Saturday 2 November
How windy? (On the summits)	Starting west to southwesterly, 25 to 35mph. Gradually easing to 10-20mph.	Variable, mostly southerly, 5 to 15mph.
Effect of wind on you?	Blustery in the morning, comfortable walking impeded. Becoming small.	Negligible.
How wet? (Precipitation and its impact)	Rain unlikely Isolated spots of drizzle not fully ruled out, but generally dry.	No rain expected
Cloud on the hills?	Hills most likely clear in the morning Low cloud covering hills from lower slopes or valley bottoms upward, during the day cloud slowly lifting to clear lower slopes.	Hills covered in cloud, most likely from 600-800m upward at start, but low cloud may also cover valleys. Cloud slowly lifting, may partly break. Chance for higher cloud base on the eastern slopes.
Chance of cloud free summits?	20%	
Sunshine? Air clarity (below cloud)	Sunny if above the cloud, with clouds developing on higher levels sun becoming broken. Excellent visibility if not in cloud.	Glimpses of sunshine, but generally cloudy. Very good visibility if not in cloud.
Temperature (at 600m)	11 to 13C	Around 9C
And in the valleys	10 to 13C, rising only a little through the day.	8 to 12C, rising only a little through the day.

Planning Outlook

All mountain areas of Britain from Friday, 1 November, 2024

After wet Friday in Scotland, back to high pressure for the weekend and beginning of next week. Inversion conditions developing mean locally very misty or cloudy, and tops sometimes above cloud. Southwesterly winds, dry and mild conditions. Such scheme holds until mid next week, when a weak front passage will probably deteriorate weather for a day, at least in Scotland. Later another few days of often cloudy, but dry and warm weather. Winds may speed up again end of next week.

Forecast issued at 16:02 on Wednesday, 30 October, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
