

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Friday, 1 November, 2024

British Mountain Summary:

Based on forecast chart for noon 1 November, 2024

Widely dull and overcast, in Highlands frequent rain, especially in the north, where windy at start. Mostly mild or warm. In England and Wales isolated spots of drizzle possible, but generally dry. Best chances for sun in northern Scotland in the afternoon, after the rain has passed.

Headline for Peak District

Widely dry, mild and breezy. Mostly cloudy

Detailed Forecast for Friday, 1 November, 2024

How windy? (On the summits)	Starting west to southwesterly, 20 to 30mph. Gradually easing to 10-20mph.
Effect of wind on you?	Slightly blustery in the morning, comfortable walking impeded. Becoming small.
How wet? (Precipitation and its impact)	Rain unlikely Isolated spots of drizzle not fully ruled out, but generally dry.
Cloud on the hills?	Hills covered, cloud slowly lifting and maybe breaking Low cloud covering hills from lower slopes or valley bottoms upward, during the day cloud slowly lifting to clear lower slopes.
Chance of cloud free summits?	20%
Sunshine? Air clarity (below cloud)	Most of the time overcast, one or two sunny hours possible. Excellent visibility if not in cloud, but most of the time dull due to cloud.
Temperature (at 600m)	11 to 13C
And in the valleys	10 to 13C, rising only a little through the day.

Peak District - Looking Ahead

	Saturday 2 November	Sunday 3 November
How windy? (On the summits)	Variable, mostly southerly, 5 to 15mph.	Mostly south or southeasterly, 10 to 20mph.
Effect of wind on you?	Negligible.	Small.
How wet? (Precipitation and its impact)	No rain expected	No rain expected
Cloud on the hills?	Firstly extensive, may break, likeliest east Hills covered in cloud, most likely from 600-800m upward at start, but low cloud may also cover valleys. Cloud slowly lifting, may partly break. Chance for higher cloud base on the eastern slopes.	Most peaks sticking above the cloud Low cloud and fog in the valleys, tops likely clear. Lower down cloud may persist the whole day.
Chance of cloud free summits?	40%	50%
Sunshine? Air clarity (below cloud)	Glimpses of sunshine, but generally cloudy. Very good visibility if not in cloud.	Plenty of sunshine and excellent visibility if above the cloud.
Temperature (at 600m)	Around 9C	8C
And in the valleys	8 to 12C, rising only a little through the day.	9C rising to 13C

Planning Outlook**All mountain areas of Britain from Saturday, 2 November, 2024**

Back to high pressure conditions for the weekend and beginning of next week. Inversion developing means often very misty or cloudy, but tops sometimes above cloud - especially the Munros. Southwesterly winds, dry and mild conditions. Such scheme holds until mid next week, when a weak front passage will probably deteriorate weather for a day, at least in Scotland. Later another few days of often cloudy, but dry and even warmer weather. Winds may speed up again end of next week.

Forecast issued at 15:44 on Thursday, 31 October, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
