Patches of cloud building on different altitudes, covering the hills at times on various levels.</p> <p>60%</p>	<p>Patchy cloud here and there</p> <p>First half of the day hills mostly clear, with some cloud patches in depressions mostly. Toward the evening cloud thickening, starting to cover the hills widely.</p> <p>60%</p>
<p>Sunshine? Air clarity (below cloud)</p>	<p>Glimpses of sunshine, but sky mostly covered by clouds.</p> <p>Often poor to moderate visibility with general haze.</p>	<p>Cloudy, below the clouds often hazy, moderate visibility.</p>
<p>Temperature (at 600m)</p> <p>And in the valleys</p>	<p>4 to 6C</p> <p>Down to 7C in the morning, rising to 9-10C, up to 12C in western dales.</p>	<p>Around 7C</p> <p>6-7C at dawn rising to max. 11C.</p>

Planning Outlook

All mountain areas of Britain from Thursday, 14 November, 2024

High pressure lasting until Friday, ending with a cold front coming from the northwest, what marks the end of fairly dry and mild period. On Saturday, the front will pass over Britain, reaching central England by the end of the day. bringing some rain to most hilly areas. Drastic cooling and big pressure drop behind the front. On Sunday and start of next week, in low pressure, frequent showers are expected, with snow on the hills, snowflakes even down to valleys and towns. In the Highlands snow may reach significant depths rapidly, meaning truly winter conditions fairly early in the season.

Forecast issued at 14:25 on Tuesday, 12 November, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
