Chance of cloud free summits?	Above 90%	90%
Sunshine? Air clarity (below cloud)	Sun and high cloud, patchy fair-weather cloud filling in for periods afternoon. Visibility excellent.	Broken cloud and sun, cloudier skies for periods. Visibility excellent.
Temperature (at 600m) And in the valleys	5C at dawn, rising to 11C afternoon, though eastern moors slightly cooler, later in the breeze feeling like 4C. Slight frost at dawn in valleys and some sheltered higher terrain. Rising to 14 to 16C afternoon.	4C rising to 10C afternoon. Feeling below freezing in the wind in morning. Slight frost in shelter at dawn, mainly toward west. Rising to 13 to 16C afternoon, warmest in west.

Planning Outlook

All mountain areas of Britain from Wednesday, 7 May, 2025

A quiet spell of weather as high pressure continues to dominate over the British Isles this week and very possibly well into next week too. Generally dry conditions, low risk of an isolated afternoon shower. Winds mostly light, direction variable. Chilly nights with frost in valleys and sheltered higher terrain. Becoming pleasantly warm into the afternoons. Sunshine and variable cloud, at times covering the sky, but generally above the mountain tops with excellent visibility. Very dry ground conditions, beware high risk of fire.

Forecast issued at 16:00 on Monday, 5 May, 2025
