Effect of wind on you?	Small, becoming uncomfortable around dusk.
How wet? (Precipitation and its impact)	No rain
Cloud on the hills?	Not expected
Chance of cloud free summits?	Nearly certain
Sunshine? Air clarity (below cloud)	Strong sunshine, a patchwork of cloud building after noon. Some haze at dawn, visibility becoming excellent.
Temperature (at 600m)	8C from dawn, rising to 15C afternoon.
And in the valleys	5C or locally cooler at dawn. Rising toward 20C during afternoon.

Peak District - Looking Ahead

	Sunday 11 May	Monday 12 May
How windy? (On the summits)	Southeasterly 20-25mph. Gusty for a time over high terrain.	Easterly 20-25mph. Notable gusts over high terrain, risk up to 30mph.
Effect of wind on you?	Comfortable walking starting to be affected in highest winds.	Walking starting to be impeded, gusts may briefly challenge stability.
How wet? (Precipitation and its impact)	Rain unlikely	Chance spots of rain Slow-moving spots of rain may develop, though likely amounting to little.
Cloud on the hills?	Not expected	Little or none A few local tops in cloud at dawn, bases soon lifting off hills. Some bases may briefly touch the highest tops if rain develops.
Chance of cloud free summits?	Nearly certain	90%
Sunshine? Air clarity (below cloud)	Mostly sunny, some high cloud around. A patchwork of fair weather cloud builds after noon. Visibility excellent, some haze early.	Glimpses of sun, becoming more frequent late in the day. Good visibility, some haze east.
Temperature (at 600m)	9C rising to 16C. Locally warmer spots on western slopes.	10 or 11C, rising to 15C
And in the valleys	5C at dawn, rising to 20 to 22C.	7C at dawn, rising to 19C. Some local valleys in the west may reach up to 21C.

Planning Outlook**All mountain areas of Britain from Sunday, 11 May, 2025**

Low pressure south and west of the British Isles will facilitate bursts of rain, possible thunderstorms, into Wales into early next week, some may reach into northwest England and west Scotland. The continental wind track and high pressure to the east will keep most cloud above the summits, with eastern areas often sunny. Generally settled conditions prevail mid-late week into next weekend as high pressure reestablishes just north of the British Isles. A mix of cloud and sun with light winds, generally easterly though variable. Slight frosts at dawn in sheltered spots, mostly warm by day. Very dry ground conditions, beware high risk of fire.

Forecast issued at 16:26 on Friday, 9 May, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
