

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Wednesday, 14 May, 2025

British Mountain Summary:

Based on forecast chart for noon 14 May, 2025

Misty low cloud in central and east Scotland in the morning; high terrain above the cloud layer. Morning low cloud east of the Pennines as well, most tops shrouded. Cloud fading to strong warm sun nearly all mountains by afternoon. Notable gusts, increasing into evening along the Pennines. Cloud-free in western areas and Wales.

Headline for Peak District

Sea fog east, dispersing; gusty winds into evening

Detailed Forecast for Wednesday, 14 May, 2025

How windy? (On the summits)	East to northeasterly 15-20mph. Notable gusts over high tops and downslope in the west, up to 25mph. Some increase in northernmost areas as night falls, gusts up to 30mph.
Effect of wind on you?	Fairly small most of the day, some uncomfortable gusts. Gusts pick up towards evening, some buffeting and stability challenges may occur.
How wet? (Precipitation and its impact)	No rain
Cloud on the hills?	Misty low cloud east and over tops early, soon all clearing Patches of misty low cloud drift over some east slopes and up to tops in the early morning. Areas north of M62 may see more frequent patches. Soon lifting and breaking to clear all terrain by late morning.
Chance of cloud free summits?	60% east at first, rising above 90%
Sunshine? Air clarity (below cloud)	Often strong sunshine, though some high cloud around will weaken sun at times. Visibility excellent; slight haze lower down in the morning.
Temperature (at 600m)	7C from dawn (small change with height); reaching 11 to 13C afternoon, always coolest in the east.
And in the valleys	5C at dawn, locally cooler in sheltered spots; rising to 17 to 19C by afternoon, warmest in west.

All mountain areas of Britain from Thursday, 15 May, 2025

High pressure persists north of Britain this week into the weekend bringing dry, warm and sunny weather. East to northeasterly winds prevail, at times strong and gusty, mainly England and Wales. Some coastal fog and low cloud drifting inland from the North Sea will affect eastern areas in the mornings (high terrain in Scotland often above the cloud layer), largely dispersing through middle of daytimes. Highest temperatures typically toward the west. Very dry ground conditions, beware high risk of fire.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
