High terrain mostly foggy, down to lower slopes in places along west coasts; best of breaks east Scotland and North Pennines. Blustery for most with risk of gales high terrain of England and north Wales.

Headline for Peak District

Patchy or frequent rain northwest slopes; very blustery for a time

Detailed Forecast for Tuesday, 24 June, 2025

How windy? (On the summits)	Westerly 25 to 30mph. Strongest sustained winds during afternoon, risk reaching up to 40mph on northern hills.
Effect of wind on you?	Blustery, affecting comfortable walking where exposed on higher moors, gusty near some edges. Strongest winds afternoon making walking arduous. Marked wind chill.
How wet? (Precipitation and its impact)	Widely rainy early, then drizzly showers northern areas Rain fairly persistent for several hours in the morning over western slopes, regularly pushing east. Drizzly showers continue moving in from the west afternoon toward north of Peak District and into Lancashire Pennines.
Cloud on the hills?	Fairly extensive, lifting southern areas Covering hills in morning above 300-500m, lowest west. Lifting to upper slopes, but may persist north from Kinder Scout.
Chance of cloud free summits?	30%
Sunshine? Air clarity (below cloud)	Fairly cloudy, some glimpses of sun, best east. Visibility excellent below cloud and away from rain (primarily east).
Temperature (at 600m)	12C, rising to 14 or 15C. Feeling nearer 5C in the wind.
And in the valleys	13C at dawn, rising to 18C afternoon.

All mountain areas of Britain from Wednesday, 25 June, 2025

West to southwesterly winds prevail this week and a series of frontal systems come in from the Atlantic. Rain and drizzle most frequent in west with low cloud often covering hills, typically most extensive in Scotland. Higher cloud bases and drier further eastwards. Temperatures near average, or lower at times in Scotland. Often windy, risk of more extensive upland gales and some heavier rain as deeper areas of low pressure likely move in later in the week. Some indication of a brief settled spell into the weekend and rising temperatures, though northwest Scotland remaining at risk of frontal weather systems.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
