

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Friday, 4 July, 2025

British Mountain Summary:

Based on forecast chart for noon 4 July, 2025

Gales and rain setting in across Scotland. Rain will be persistent and heavy in the west - beware risk of local flooding. Clear fells for a time in England, rain and cloud setting in later afternoon. The Pennines from Yorkshire Dales southward mostly dry and free of cloud. A fair but windy day in Wales, rain only arriving later in north Wales.

Headline for Peak District

Strong wind, risk gale force later; substantially dry

Detailed Forecast for Friday, 4 July, 2025

How windy? (On the summits)	West to southwesterly 30-35mph. Speeds rise through afternoon towards 40-45mph.
Effect of wind on you?	Increasingly strenuous walking conditions over exposed terrain. Marked wind chill.
How wet? (Precipitation and its impact)	Substantially dry, rain setting in as evening approaches Dry most of the day. As evening approaches, rain sets in from the west, increasingly persistent and heavy on western slopes. Likely only patchy rain reaches eastern slopes.
Cloud on the hills?	Soon lifting above hills Some cloud banks may graze higher western moors in the morning, lifting above tops until late evening. Cloud will reach high tops as night falls, filling in fairly extensively overnight.
Chance of cloud free summits?	90%
Sunshine? Air clarity (below cloud)	Fairly cloudy, occasional sun best in east. Visibility very good.
Temperature (at 600m)	10C rising to 14C, locally warmer southernmost hills and east. Feeling like 3 to 6C in the wind.
And in the valleys	12C at dawn, rising to 20C afternoon.

All mountain areas of Britain from Saturday, 5 July, 2025

The weekend ahead will be generally unsettled: windy and feeling cool with low pressure bringing heavy showery rain widely. High pressure to the southwest will extend to the Isles early next week, settling the weather and allowing sun to break through Monday and Tuesday. Into the week, a mixed westerly regime dominates with greatest risk of rain toward northwest Scotland, drier and warmer further south and east. Several fronts will drift towards Britain from the northwest but high pressure to the southwest will prevent extended unsettled periods. England and Wales may only see occasional rain.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
