| | |
|---|--|
| How windy? (On the summits) | At dawn, westerly 10mph or less, then light winds with variable direction most of the day. |
| Effect of wind on you? | Negligible. |
| How wet? (Precipitation and its impact) | No rain |
| Cloud on the hills? | No cloud expected |
| Chance of cloud free summits? | Almost certain |
| Sunshine? Air clarity (below cloud) | Widespread sunshine; beware sunburn and dehydration. Excellent visibility on higher ground looking over low-level haze in the Midlands. |
| Temperature (at 600m) | 18C in the morning, rising to 23 or 24C in the afternoon. Remaining warm on high ground overnight. |
| And in the valleys | 12 to 15C at dawn, soon above 20C in the morning. Rising to 27 to 30C by mid-afternoon. |

Peak District - Looking Ahead

| | Saturday 12 July | Sunday 13 July |
|--|--|---|
| How windy? (On the summits) Effect of wind on you? | Light easterly winds, less than 10mph and often variable direction. Rising to 15-20mph afternoon. Negligible, much of the day, a few uncomfortable breezes later in the day. | Easterly 15-20mph. Breezier in the morning, risk up to 30mph downslope in the west. Buffeting downslope winds in the west early, becoming fairly small. |
| How wet? (Precipitation and its impact) | No rain | No rain expected |
| Cloud on the hills? Chance of cloud free summits? | Cloud not expected Almost certain | No cloud expected Above 90% |
| Sunshine? Air clarity (below cloud) | Widespread strong sunshine; beware sunburn, dehydration and heatstroke. Low level haze, but excellent visibility on high ground. | Sunny at dawn, then patchy high cloud building, at times shrouding sun. Excellent visibility. |
| Temperature (at 600m) And in the valleys | 18C rising to 24C by mid-afternoon, remaining mild overnight on high ground. Soon 24C, rising to 28 to 31C by mid-afternoon. | 16C rising to 20C 13C at dawn, rising to 25C, locally warmer southernmost areas. |

Planning Outlook

All mountain areas of Britain from Saturday, 12 July, 2025

Very warm or hot conditions this weekend in the mountains and the valleys, with extreme risk of wildfire in Scotland; beware dehydration and sunburn. Light winds and very little cloud.

Low pressure returns late Sunday into Monday bringing rain to most, risk heavy or thunderstorms north England and Scotland. Temperatures will cool towards average and often raining for the first half of the week. Becoming more mixed from mid-week as pressure goes slack and Atlantic fronts make only weak pushes from the west. Patchy rain and cloud will come and go with the best opportunities for sun in north and western areas.

Forecast issued at 16:08 on Thursday, 10 July, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
