## General Summary for Tuesday, 19 August, 2025

### British Mountain Summary:

#### Based on forecast chart for noon 19 August, 2025

A cooler feeling day with a rather gusty east to north-east airflow. An extensive cloud sheet, with local drizzle, covering many hills from dawn, but some westernmost hills still clear. Low cloud will burn back to eastern and northern hills, with sun most widely in the west, but low cloud persisting for parts of coastal western Scotland.

### Headline for Peak District

Breezy and feeling cooler. Cloud sheet mostly above tops. Sunny breaks west.

## Detailed Forecast for Tuesday, 19 August, 2025

<b>How windy? (On the summits)</b>	East to northeasterly 15 to 20mph, in places gusty 25mph around high tops and exposed edges; may rise late in the day.
<b>Effect of wind on you?</b>	<b>Noticeably breezy and feeling cool in exposure, gusts on some slopes may start to affect comfortable walking.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Rain unlikely</b> Local pockets of drizzle possible around cloud banks in the morning, mainly eastern moors.
<b>Cloud on the hills?</b>	<b>Patchy cloud clearing</b> Cloud drifting over some higher moors in the morning, particularly eastern areas, cloud base around 500-600m. Lifting and breaking above the hills by late morning.
<b>Chance of cloud free summits?</b>	<b>50% rising above 90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Cloud extensive, but sunny breaks best in the west and southwest. High cloud layers making the sun hazy. Visibility good, or increasingly very good.
<b>Temperature (at 600m)</b>	10 to 12C in morning, rising to 14C.
<b>And in the valleys</b>	12C at dawn, rising to 20C afternoon.

**All mountain areas of Britain from Wednesday, 20 August, 2025**

High pressure centred toward the northwest this week, before building overhead again toward weekend. East to northeasterly winds prevailing, gusty for periods, easing out later in week. Extensively dry with sunshine best in west, low cloud for periods northern and eastern mountains with occasional drizzle. Still very dry underfoot with significant fire risk. Turning cooler through midweek, mountain temperatures falling, chilly into the valleys and glens pre-dawn, risk slight frost in Highland glens. Fine weather likely next weekend too; will likely begin to break down from the west into the following week, but uncertainty on timings of such a transition.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
