

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Monday, 13 October, 2025

British Mountain Summary:

Based on forecast chart for noon 13 October, 2025

Inversion conditions widely across Scottish highlands. High tops of Lakeland and Snowdonia also likely above a cloud layer. Feeling quite warm in the autumn sunshine on summits above the cloud; valleys and glens starting cooler. Cloudier over Pennines and east Wales, most fog rising to high terrain with local breaks.

Headline for Peak District

A foggy morning, lifting to high moors with local breaks

Detailed Forecast for Monday, 13 October, 2025

How windy? (On the summits)	Variable or southeasterly 10 to 15mph, strongest gusts toward southwest of the region.
Effect of wind on you?	Small
How wet? (Precipitation and its impact)	Rain unlikely Small chance of spotty very light rain around sunset on eastern slopes.
Cloud on the hills?	Morning fog lifts to or off high moors A fairly broad sheet of cloud at daybreak, including low fog in the valleys. Some local breaks just west of high edges. Bases gradually lift to the high moors with breaks off the tops, mainly afternoon.
Chance of cloud free summits?	60%
Sunshine? Air clarity (below cloud)	A largely foggy and dull day. A few brighter moments are possible on slopes west of high moors. Good visibility, some haze.
Temperature (at 600m)	11 or 12C.
And in the valleys	8C from dawn, rising to 16C.

Peak District - Looking Ahead

	Tuesday 14 October	Wednesday 15 October
How windy? (On the summits)	Northeasterly 10 to 15mph.	Variable 10-15mph, may trend northeasterly. Some local gusts at all elevations.
Effect of wind on you?	Small	Mostly small
How wet? (Precipitation and its impact)	No rain expected	No rain expected
Cloud on the hills?	Fog and cloud banks, clearing afternoon Varied valley fog and cloud banks on some hill slopes in morning, some tops may start above the fog, but then cloud drifting higher up, perhaps clearing above the hills into middle of day or afternoon.	Patchy morning fog lifts off summits Patchy cloud at all heights at dawn, gradually lifting as the day goes for clear moors. Low risk of cloud banks returning to high terrain at times.
Chance of cloud free summits?	60%	Becoming 90%
Sunshine? Air clarity (below cloud)	Some sun on tops from dawn, then patchy cloud and sun during daytime. Hazy or misty start lower down, then good visibility, some haze may linger.	Becoming often sunny as cloud lifts and breaks. Good visibility though a haze.
Temperature (at 600m)	8 or 9C, small variation from lower slopes upward in morning.	7 to 9C.
And in the valleys	7C at dawn, rising to 15C afternoon.	7C at dawn, locally cooler in valleys just east of high edges. Rising to 14C.

Planning Outlook**All mountain areas of Britain from Tuesday, 14 October, 2025**

High pressure resides over the country through the week, maintaining quiet weather. In the mornings, varied low cloud and morning fog is likely while inversion conditions likely to remain over highest mountains for several days. A haze will linger on low slopes below the inversion. During midweek the inversion starts to weaken as pressure begins to fall gradually; cloud will be well-broken for many and begin to lift to higher terrain. Light winds overall, an easterly breeze likely for Wales.

Uncertainty about the weather pattern development toward next weekend: some indication of strengthening winds bringing some rain, but may not reach all areas. Later October has hints of chillier northerly air, especially in Scotland.
