

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Sunday, 19 October, 2025

British Mountain Summary:

Based on forecast chart for noon 19 October, 2025

Gale-force south to southeasterlies across the mountains. Extensively wet with blanket low cloud. The heaviest rain across Wales and southwest Scotland, pushing further across the southern Highlands with time. Driest conditions for northern Scotland early in day; briefly drier Pennines mid-late morning.

Headline for Peak District

Gale/near-gale on tops. Patchy rain, then persistent, heavier.

Detailed Forecast for Sunday, 19 October, 2025

How windy? (On the summits)	Southeasterly 30 to 40mph, speed varying during day, gusty around higher edges; starting to lessen later.
Effect of wind on you?	Expect blustery conditions, challenging walking exposed higher areas, gusts affecting balance. Marked wind chill.
How wet? (Precipitation and its impact)	Rain and drizzle from dawn, briefly drier, then setting in heavier Patchy or light rain at first, then drier for a few hours particularly eastern areas. With time, constant rain developing, becoming heavy afternoon, particularly west and southwest hills. Fading from dusk onward.
Cloud on the hills?	Fairly extensive Varied cloud banks from dawn, some brief breaks possible for a few hours, but as rain develops, widely filling in across the moors, to mid-elevations many places.
Chance of cloud free summits?	10% in rain, 50% around late morning
Sunshine? Air clarity (below cloud)	Sun unlikely, overcast all day. Hazy, or widely murky in rain.
Temperature (at 600m)	8C rising to 10C. Feeling below freezing directly in the wind.
And in the valleys	10C at dawn, slow rise to 13C later in the day.

All mountain areas of Britain from Monday, 20 October, 2025

A mixed outlook into the new week as low pressure dominates with areas of rain and showers , which will vary locally day-to-day. Some windows of drier weather, particularly central parts of the Highlands. Wind speeds will also vary, but some lulls, but abrupt spells of upland gales possible. Risk of heavier rain spreading from Wales into northern England and southern Scotland later Wednesday into Thursday. Likely significantly colder later in the week with northerly winds, dropping below freezing on higher mountains, with snow showers especially Scottish Munros.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
