

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Thursday, 15 January, 2026

British Mountain Summary:

Based on forecast chart for noon 15 January, 2026

Blustery and chilly south-westerly winds bringing occasional snow and hail showers, most prevalent across the west Highlands. Rain falling below 500m. Drier for England and Wales, but risk of marked deterioration later for southern and eastern Wales as rain and summit snow edges in from the south.

Headline for Peak District

Areas of low cloud, rain later southeast. Moderate breeze.

Detailed Forecast for Thursday, 15 January, 2026

How windy? (On the summits)	Southwesterly 15-20mph. There will be a pronounced lull in the afternoon, then picking up again after dusk with an easterly.
Effect of wind on you?	Mostly fairly small.
How wet? (Precipitation and its impact)	Largely dry, rain later east Isolated showers of rain, and on the highest tops sleet. Later afternoon, an area of rain moving up from south, mainly affecting eastern parts of Peak District.
Cloud on the hills?	Varied low cloud Banks of low cloud over hills for periods, most persistent southern areas.
Chance of cloud free summits?	50%
Sunshine? Air clarity (below cloud)	Little if any sun. Visibility good away from cloud, but areas of lingering murk.
Temperature (at 600m)	2C
And in the valleys	6C in the afternoon.

All mountain areas of Britain from Friday, 16 January, 2026

A small scale low will pull away early on Friday morning to the North Sea to leave drier and chilly conditions into the weekend with a south to south-easterly airflow developing. Looking further ahead, a colder continental influence may be drawn in on south to east winds, but the extent of this is uncertain. The snow pack across the Scottish Highlands will be enhanced by further spells of snowfall where where fronts edge in from the west, whilst for England and Wales snow accumulating on the hills at times, perhaps in the form of showers from the east.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
