<b>Temperature (at 600m)</b>	4C	4C
<b>And in the valleys</b>	Reaching 8C in the afternoon.	Lifting to 6 or 7C

**Planning Outlook****All mountain areas of Britain from Sunday, 8 February, 2026**

Overall little change in conditions over the coming week: the mountains extensively foggy, precipitation from time to time (again concentrated on eastern Scotland and southern and eastern Wales) and often strong southeast or easterly wind. However, a slight rise in temperature will result in thawing of lying snow from southern Scotland southwards and some thawing up to around 900, sometimes 1050m Scottish Highlands - although the return of low freezing level toward the middle of next week.
