## General Summary for Monday, 2 March, 2026

### British Mountain Summary: Based on forecast chart for noon 2 March, 2026

A slow-moving front brings rain, drizzle and low cloud to England and Wales, also eastern Scotland at first. To the east of this, strong to gale-force winds at first east. Lighter winds for much of the Highlands all day, cloud lifting with sunny spells. Later in day, rain and hill snow moves in from west.

### Headline for Peak District

Windy start, easing. A little rain develops, varied cloud.

## Detailed Forecast for Monday, 2 March, 2026

<b>How windy? (On the summits)</b>	South to southwesterly; 35-40mph early morning, dropping gradually, to 20-25mph afternoon.
<b>Effect of wind on you?</b>	<b>Very blustery conditions affecting ease of walking mainly in the morning, tending to become smaller with time.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Rain or drizzle later west</b> A slow-moving band of rain to the west moves gradually into the region to give mostly light rain and drizzle in the west by afternoon. Likely dry all day eastern areas.
<b>Cloud on the hills?</b>	<b>Varied, mostly west</b> Cloud banks mostly above 500-600m and in western areas, but some varied lower patches early in day. Where rain develops, lowering further in west, otherwise much cloud may stay above hills, especially east.
<b>Chance of cloud free summits?</b>	<b>60%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Largely cloudy, some brighter skies and occasional sun in east, visibility reducing if rain arrives in west, but very good where dry.
<b>Temperature (at 600m)</b>	5 or 6C. If exposed to stronger wind, feeling like -5C early in day.
<b>And in the valleys</b>	8C from dawn, rising to 11C afternoon.

## Peak District - Looking Ahead

	<b>Tuesday 3 March</b>	<b>Wednesday 4 March</b>
<b>How windy? (On the summits)</b>	Variable or at times southerly, 15mph in places, but likely often less.	Southerly 20mph.
<b>Effect of wind on you?</b>	<b>Mostly small.</b>	<b>Fairly small, but feeling blustery around some exposed tops and edges. Noticeable wind chill.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Precipitation unlikely</b>	<b>Precipitation unlikely</b> A little misty drizzle possible if in early cloud.
<b>Cloud on the hills?</b>	<b>Early cloud clears</b>  Some patchy cloud around higher slopes, local mist lower down at first, but likely to soon disperse to leave hills clear.	<b>Early low cloud lifting</b>  Risk of cloud covering higher moors plus some fog lower down in the morning, tending to lift with time and break above most tops onward into afternoon.
<b>Chance of cloud free summits?</b>	<b>80%</b>	<b>20% rising to 80%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Fairly cloudy but bright, some sun through high cloud. Visibility mostly good, but may start misty and leave some haze.	Hazy and cloudy morning, improving with some sun and better visibility afternoon.
<b>Temperature (at 600m)</b>	3 to 5C.	5 to 7C. Directly in the wind feeling close to 0C.
<b>And in the valleys</b>	6C rising to 9 or 10C afternoon.	4C from dawn, rising to 11C afternoon.

**Planning Outlook****All mountain areas of Britain from Tuesday, 3 March, 2026**

Varying conditions over the next couple of weeks as areas of high pressure build across the British Isles then slip eastwards. Some dry and bright days with light winds mixed with periods of strengthening southerly winds bringing occasional rain coming in from the west - Thursday this week sees rain move increasingly onto western hills. Temperatures will vary, often lifting just above freezing to higher tops, but occasionally dropping back below freezing - chillier air briefly later this week. Some frosts into valleys. Remaining old snow cover on Scottish mountains stays largely consolidated with little change, patchy around highest tops in England and Wales.

**Forecast issued at 16:30 on Sunday, 1 March, 2026**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
