

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Wednesday, 10 June, 2026

**British Mountain Summary:
Based on forecast chart for noon 10 June, 2026**

Showery westerlies, scattered bursts of rain moving eastward across the country, locally heavy with a chance of thunder, mainly eastern areas by afternoon. Improving to drier and brighter conditions for western England and Wales with time. Breezes tending to freshen. Feeling rather cool.

Headline for Peak District

Showery, easing afternoon. Breeze increasing.

Detailed Forecast for Wednesday, 10 June, 2026

| | |
|--|---|
| How windy? (On the summits) | Westerly 15 to 20mph, tending to rise to 25mph afternoon and into evening. |
| Effect of wind on you? | Fairly small, but noticeable chill factor and feeling breezier, later more blustery over exposed higher moors. |
| How wet? (Precipitation and its impact) | Showers moving east, risk thunder Showery rain in west in morning, developing more widely to be showery middle of day into afternoon, risk some hail and thunder. Heavier showers clear eastward to leave odd light showers toward evening. |
| Cloud on the hills? | Occasionally in rain Patches forming at times over the tops in and around showers, otherwise most cloud above the hills. |
| Chance of cloud free summits? | 80% |
| Sunshine? Air clarity (below cloud) | Variable cloud and bursts of sun. Visibility mostly very good, but poorer in showers. |
| Temperature (at 600m) | 4C lifting to 7C. Feeling near to freezing in the stronger breeze, or just below 0C early in day. |
| And in the valleys | 7C at dawn, lifting to highs of 13 or 14C afternoon, but dropping a few degrees in showers. |

Peak District - Looking Ahead

| | Thursday 11 June | Friday 12 June |
|---|---|--|
| How windy? (On the summits) Effect of wind on you? | South-southwesterly turning westerly later, 20mph to often 25-30mph, may increase to gusty 35mph over high terrain. Varied, but risk often blustery over higher terrain, at times affecting ease of walking with noticeable wind chill. | Westerly 25 to 30mph. Blustery over the hills, more strenuous in places where exposed. Feeling cool despite fairly mild air. |
| How wet? (Precipitation and its impact) | Persistent rain Rain arriving from dawn in west, some steadier heavier falls for periods through the morning. Rain and drizzle likely continues through afternoon-evening, may break up a little with time. | Occasional drizzly rain Patchy light rain and drizzle most common over western moors, particularly areas near/north of M62. More often dry east and southernmost Peak District. |
| Cloud on the hills? | Extensive over hills Soon shrouding most hills above 500-600m, some banks to lower slopes western areas, especially northern Peak and into mid-Pennines. | Fairly extensive on high terrain Often foggy over higher moors above 500-600m, sometimes shrouding hill slopes to lower elevations in west. Sometimes the cloud rising higher in east. |
| Chance of cloud free summits? | 20% | 30% |
| Sunshine? Air clarity (below cloud) | Overcast and dull. Poor visibility much of day in rain. | Largely cloudy, glimpses of sun mostly eastern areas. Visibility good where dry and below cloud, mistier over tops and in rain locally. |
| Temperature (at 600m) And in the valleys | 6C rising to 10C. Feeling like 0 to -3C directly in wind. 9C at dawn rising to 13C afternoon, or slightly milder toward evening. | 10C rising to 13C afternoon. Feeling like 0 to 3C where exposed to wind. 11C at dawn, rising to 18C afternoon. |

Planning Outlook**All mountain areas of Britain from Thursday, 11 June, 2026**

Damp westerly breezes on Friday will cloak most mountains in cloud and some drizzle, better conditions eastwards. Cool and strong westerlies persist in Scotland on Saturday, then warmer with lighter winds by Sunday. Some patchy rain remaining in west and northwest Scotland over the weekend. Pressure tends to rise from the south this weekend, bringing warmer air and drier conditions to England & Wales, although west coast mountains may hold onto cloud. Into next week, a mixed southwesterly pattern remains, windy at times with periods of rain, drizzle and low cloud most persistent in the west. Warmest in England and Wales, but cooler westerly air likely returns at times mid-late week. Higher pressure then shows more signs of expanding over the country by late next week bringing improving conditions.
