Planning Outlook

All mountain areas of Britain from Friday, 10 July, 2026

Staying warm in Scotland, hot for England and Wales into the weekend. High pressure shifts northward, facilitating a strengthening easterly wind across most areas. Some lingering cloud and rain over the Scottish Highlands on Friday and Saturday, some risk of heavier thundery bursts on Friday. The weekend is likely dry across England and Wales with fairly extensive sun, some sea fog beginning to affect northeastern hill groups later weekend.

Easterly wind will persist next week, sometimes quite strong England and Wales. Mostly sunny and quite hot, including Scottish Highlands. Low pressure south of the country may push showers into Wales, though confidence is low.

Otherwise, this hot and dry pattern is likely to persist until late next week, at least.

Forecast issued at 16:20 on Wednesday, 8 July, 2026
