## General Summary for Wednesday, 11 November, 2026

**British Mountain Summary:**
**Based on forecast chart for noon 11 November, 2026**

Many places stay dry all day with sunshine and broken cloud. Below freezing on Scottish tops. A band of rain and hill snow moves into northern Scotland during the day, plus a strengthening northwesterly wind. Easterly winds for Wales, light rain in the south fizzles out, but leaves low cloud and dampness.

**Headline for Peak District**

Gusty wind; largely dry, cloud thinning, hills clearing.

## Detailed Forecast for Wednesday, 11 November, 2026

| | |
|---|---|
| **How windy? (On the summits)** | Easterly 20 to 25mph, gusty 30mph in places around higher edges early morning. Dropping during the day toward 10-15mph up to dusk. |
| **Effect of wind on you?** | **Affecting comfortable walking on exposed terrain in morning, variable gusts to some lower elevations. Marked wind chill. Improving during day.** |
| **How wet?** (Precipitation and its impact) | **Largely dry, some early dampness**<br>Patchy light rain toward the far south of the region around dawn, fading out to be substantially dry, chance of a rare light shower, mainly in the east. |
| **Cloud on the hills?** | **Early low cloud clearing**<br>Banks of cloud cover some higher moors in the morning, particularly more eastern slopes, whilst westwards better breaks. Most cloud clearing hills into middle of day. |
| **Chance of cloud free summits?** | **50% rising to 90%** |
| **Sunshine?** Air clarity (below cloud) | Sunshine hazy due to high cloud in morning, starting cloudier south, brighter toward the north.<br>Visibility becoming mostly excellent. |
| **Temperature (at 600m)** | 3 or 4C.<br>Feeling like -5C directly in the stronger wind in the morning. |
| **And in the valleys** | 5C from dawn, rising to 8C middle of day. |

| | Thursday 12 November | Friday 13 November |
|---|---|---|
| **How windy? (On the summits)** | Northerly 20 to 25mph, at times 30mph higher tops. | Northwesterly, 15mph to at times 20mph on higher moors. |
| **Effect of wind on you?** | **Affecting comfortable walking in places on exposed higher moors. Considerable wind chill.** | **Mostly small, but feeling chilly on exposed higher areas.** |
| **How wet?** (Precipitation and its impact) | **No precipitation expected** | **Precipitation not expected** |
| **Cloud on the hills?** | **None expected** | **None expected** |
| **Chance of cloud free summits?** | **Above 90%** | **Above 90%** |
| **Sunshine?** Air clarity (below cloud) | Extensive sunshine. Visibility excellent. | Extensive sunshine. Visibility excellent. |
| **Temperature (at 600m)** | 1 or 2C. Feeling like -7C directly in the wind. | 0C rising to 2C. |
| **And in the valleys** | Frost widely in valleys in morning. Rising to max 7C afternoon. | Much terrain frozen from dawn with frost all day out of sunlight. Maximum 6C by afternoon. |

## Planning Outlook

**All mountain areas of Britain from Thursday, 12 November, 2026**

Chillier in the second half of this week with frost widely, but much clearer conditions for all with sunshine. Into the weekend, as the wind shifts west then southwesterly, less cold air drifts in from the Atlantic bringing more cloud onto western hills - some rain mainly in western Scotland, whilst England and Wales may remain largely dry for the weekend. A changeable outlook into next week with varying temperatures, stronger wind at times, rain and some upland snow possible. Unsettled patterns are more likely to prevail beyond mid-month.
