General Summary for Friday, 13 November, 2026

British Mountain Summary:
Based on forecast chart for noon 13 November, 2026

Under high pressure most mountain areas fine with sunshine. However, progressively north across Scotland, increasing strong westerly wind will bring snow showers to mainly the NW Highlands and low cloud across western mountains. Much terrain frozen - but freezing level rising through day.

Headline for Peak District

Most terrain frozen. Bright sunshine.

Detailed Forecast for Friday, 13 November, 2026

How windy? (On the summits)	Northwest backing westerly 15 to perhaps 20mph
Effect of wind on you?	**Small.**
How wet? (Precipitation and its impact)	**Precipitation not expected**
Cloud on the hills?	**Not expected**
Chance of cloud free summits?	**Almost certain**
Sunshine? Air clarity (below cloud)	Bright sunshine. Visibility excellent or superb.
Temperature (at 600m)	-1C rising to 2C.
And in the valleys	Terrain nearly all frozen morning, but then a thaw, with valley temperatures drifting up to 4 to perhaps 6C.

Peak District - Looking Ahead

	Saturday 14 November	Sunday 15 November
How windy? (On the summits)	South or southwesterly between 15 and perhaps on highest areas 25mph.	Very low confidence near centres of low pressure: Varied direction, possible prolonged lull but anticipate up to 40mph.
Effect of wind on you?	**Mostly fairly small.**	**Sometimes small, but zones where wind chill significant and walking difficult - these challenging conditions could set in abruptly.**
How wet? (Precipitation and its impact)	**Rain unlikely**	**Intermittent rain** Areas of rain will circulate within general low pressure.
Cloud on the hills?	**Very little** Fog may form now and again some higher slopes, most likely toward the west; but generally the hills cloud free.	**Fog very likely across the mountains all day** Fog in some areas from lower slopes up, and few breaks above 600m.
Chance of cloud free summits?	**80%**	**20%**
Sunshine? Air clarity (below cloud)	Sunshine most or all day. visibility very good after fog some valleys morning.	Sunshine rare if any. Regions of very poor visibility; sometimes very good.
Temperature (at 600m)	1 rising to 3C.	4C
And in the valleys	Widely frosty morning; by early afternoon the temperature between 5 and 8C.	Around 7C.

Planning Outlook

All mountain areas of Britain from Saturday, 14 November, 2026

Pressure will fall over the weekend: a little rain for some western mountains on Saturday, but more widespread rain (snow higher areas Scottish Highlands) on Sunday - albeit the detail for Sunday is unusually uncertain (for a 3 day forecast). Cold often dry conditions will return on Monday, but beyond extensive rain (sometimes snow higher areas) and strong winds probable, although presently Scotland, particularly the Highlands may have only snow showers in the cold air.

Forecast issued at 12:05 on Thursday, 12 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
